

Work Better.

Healthcare

ergotron

Serving those who care most.

At Ergotron, we believe better care starts with better support for caregivers. For decades, we've designed ergonomic solutions that support caregivers across roles, workflows, and environments—improving comfort, efficiency, and confidence at the point of care.

Our healthcare legacy

40+ years of ergonomic expertise

Products used in health systems worldwide

30+ years supporting healthcare workflows

Headquarters and design center in St. Paul, Minnesota

Built on trust

Certified Best Practices

- ISO 9001:2015 quality management
- ISO 13485:2016 certified for healthcare manufacturing
- Power systems certified by Nationally Recognized Testing Laboratory

Tested for Real-World Care

- 100% functional testing on every product
- Cycle testing for long-term durability
- 4x load testing for safety in demanding environments

End-to-End Secure Architecture

- RhythmConnect software and RhythmConnect-ready hardware are FIPS 140-3 validated
- Secure authentication and encrypted communication
- No software installed on customer images or server

Packaging & Delivery Standards

- ISTA-tested packaging for safe global transport

Proven in practice

Supporting operations and clinical workflows across the healthcare ecosystem

From morning rounds to critical health decisions.
Where seconds matter, we help clinicians stay
focused so patients come first.

Clinics & physician offices

- Intake and exam spaces
- Shared work areas
- Provider documentation zones

Acute & ambulatory care

- Patient rooms
- ICUs and step-down units
- Exam and procedure rooms

Nurse stations and mobile registration

- Centralized and decentralized stations
- Height-adjustable shared workspaces
- Clean, organized technology access

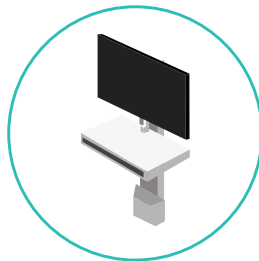

**Efficiency drives outputs.
We help work and technology
adapt to the needs of people.**

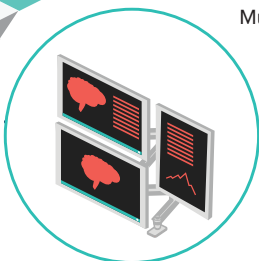

RhythmConnect™
Fleet Management

Space-Saving
Solutions

Multi-Mounts

Administrative & back office

- Centralized and individualized stations
- Height-adjustable shared workspaces
- Clean, organized technology access

Pharmacy & laboratories

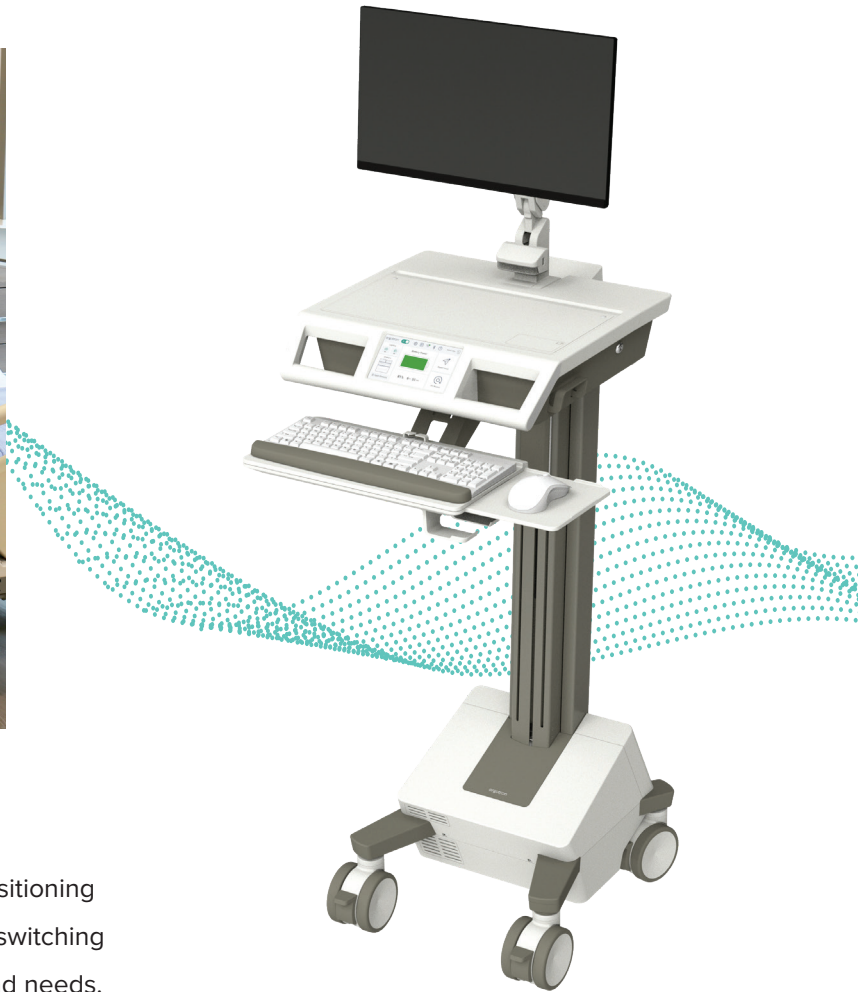

- Space-efficient wall stations
- Mobile access to systems
- Durable designs for continuous use and rigorous cleaning standards

Radiology & specialty suites

- Ergonomic monitor positioning
- Flexible configurations
- Reliable performance in high-use areas

Connect, scale, and evolve care

Mosaic is the plug-and-play platform built to make IT teams more efficient and caregivers more effective—without added complexity. User-friendly and scalable, this “smart cart” was designed to give time back to those who need it most.

Top Benefits of Mosaic Workstation

- Support sit-to-stand workflows and comfortable positioning
- Smooth adjustments and mobility for efficient task switching
- Modular design adapts to changing users, roles, and needs.
Swap parts, not carts!

Smarter Workflow Solutions

- Tech-forward features simplify workstation deployment, management, and use. ***Subscribe to RhythmConnect software for full fleet intelligence.***
- Supports teams by unifying processes for greater efficiency
- Smart security: configurable, locking drawers for secure access
- Empowers caregivers to prioritize what matters most — patient care

FIPS 140-3 Inside Certificate #5026
go.ergotron.com/FIPS-Security

FIPS Validated

RhythmConnect software and compatible products like Mosaic, Envoy, and Encore include a FIPS 140-3 validated cryptographic module providing cryptographic services needed to securely support the industry standard FIPS (Federal Information Processing Standard).

Actionable fleet intelligence

RhythmConnect goes beyond basic dashboards to deliver actionable intelligence for powered mobile workstations. By combining location, usage patterns, and predictive battery health, it shows what's at risk, where to focus, and what action to take next—all in one platform with optional tech stack integrations that IT teams are already using.

Battery Health

View an entire fleet of batteries to identify trouble areas. Within seconds, you'll know which batteries need to be refreshed now and for the future.

Real-Time Status

Real-time workstation usage and battery performance are key decision support metrics that ensure workstations are optimized for your staff.

Actionable Reports

Remove guesswork and make informed decisions with intuitive reports that deliver actionable insights for managing your fleet.

Asset Snapshot

Keep a clear view of your total asset inventory with one concise report.

Case Detail

Get customer-related information about your cases on the fly. With each work order, details are displayed with mapping and shipment status.

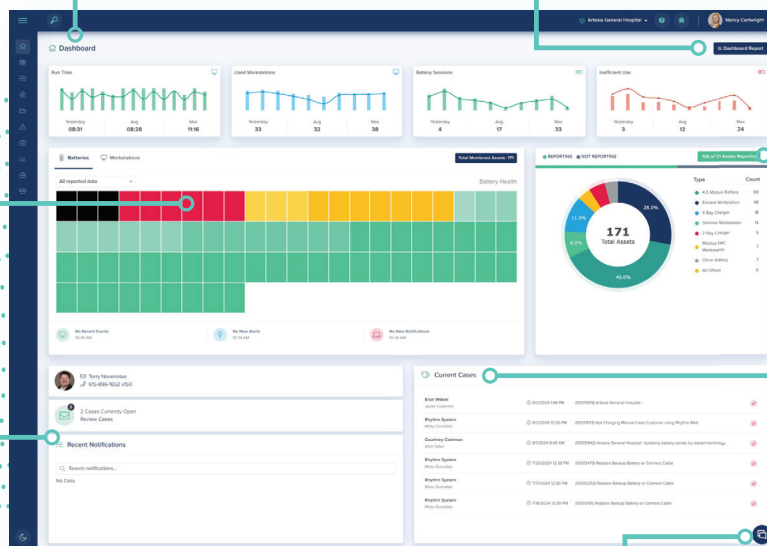

Notifications

Device notification history is key in understanding recurring issues. The list is searchable so you can identify issues and trends quickly and respond accordingly.

AI Assistant

The AI Assistant leverages system data, as well as software and product manuals to provide both insight and contextual support.

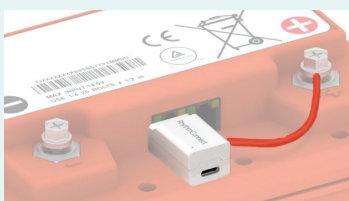

One platform, two ways to connect

Embedded RhythmConnect

- Full fleet intelligence and recommendation-based insights
- RhythmConnect-ready assets include Mosaic, Envoy, and Encore mobile workstations.

RhythmConnect Link

- Connectivity and essentials for broader fleet visibility
- Compatible with hardware using smart U-1 battery technology

Fostering the nurse-patient connection

Support genuine patient connections and help reduce the risk of errors with wall and mobile workstations that enable an efficient and comfortable documentation experience.

CareFit Combo

Top Benefits

- Easy screensharing
- Intuitive access to tools
- Sturdy design supports multiple configurations

Smart Space Solutions

- Space-saving design easily folds when not in use
- Flexibility to move and extend unit per caregiver
- Multiple configurations are easy to clean and service
- Enable secure access with space for an RFID badge reader

- Ultra-lean, lightweight, and compact design
- Full sit-to-stand height adjustment on both LCD and Laptop models

CareFit
Wall Enclosure

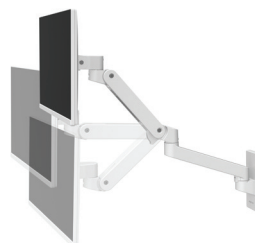

- Low-profile design stays within 4" of the wall to fit tight spaces
- 10-digit lock code keeps patient data and technology secure

LX Pro **Wall Mount System**

Industry-leading design that allows more motion with less effort for best-in-class ergonomic positioning and easily folds up within inches of the wall when not in use.

LX Pro **Monitor Mount Collection**

Adaptable, adjustable, and user-forward. Easy installation for streamlined deployment. More motion with less effort for best-in-class ergonomic positioning.

Mobile Power

Innovative three-part battery system enables hot-swap or on-cart charging for medical carts. LCD monitoring and magnetic connections minimize downtime during workflows.

Neo-Flex

Low-profile, dual-monitor imaging solution maximizes space while providing convenient PACS access. Tilt screens reduce glare and increase productivity in space-constrained environments.

Additional solutions

StyleView

A collection of wall and mobile workstations designed to enhance workflows through ergonomic, customizable designs that improve caregiver efficiency and patient satisfaction throughout shifts.

WorkFit Elevate

Sit-to-stand wall desk for comfortable documentation or collaboration, even in high-traffic areas or space-limited areas. Frees up floor space with a flip-down work surface.

Encore

A durable option for everyday use that's optimized with fast hot-swap power for dependable full-shift deployment. Encore meets core clinician needs through easy maneuverability and the option for integrated device management.

Envoy

Built for complex or high-acuity environments where both clinical and IT teams need deeper connectivity. Supports common workflows with integrated device management, security and IT ticketing for a more automated experience.

Zip12

Charging Cabinet

Securely stores and charges 12 tablets/Chromebooks up to 14". Universal design with PowerShuttle Technology ensures fast charging and future device compatibility.
