Mobile solutions

Professional-grade mobile carts deliver on-the-go documentation and power. They allow for information access in areas that typically do not support permanent placement, such as corrosive, high particulate, or extreme environments. When it is essential for technology to move from one work area to the next, mobile carts are the solution.

StyleView™ Cart with LCD Pivot, LiFe Powered

- Promotes productivity and accuracy by keeping technology and tools close
- Ergonomic design enhances well-being and helps reduce the risk for injury
- Computer cart ships fully assembled for easy set-up and deployment
- Quality construction withstands everyday use with durable, easy-to-clean exterior
- On-board LiFe battery keeps equipment safely and reliably powered

Part number

SV42-8302-1 US/CA/MX

Neo-Flex® Dual WideView WorkSpace

- Dual display configuration designed to handle image-intensive applications
- Heavy-duty design is customizable and scalable
- Open architecture and optional accessories enable laptop or PC use

Part number

24-194-055

Neo-Flex® LCD Cart

- Sit or stand, includes an articulating monitor arm with screen height adjustment
- Designed for use with a mini-PC

Part number

24-206-214

Neo-Flex® Laptop Cart

Features a laptop security system and sit-stand height adjustment

Part number

24-205-214

WorkFit™-C Sit-Stand Workstation

- Small footprint and lightweight; great for tight spaces
- Sit-stand height adjustment and flexibility of configuration
- Space for dedicated assets, yet easily moved and removed
- Includes CPU holder that attaches to the rear of the workstation

Heavy-duty

24-214-085 Dual

24-215-085 Single LD

24-216-085 Single HD

CareFit Slim Laptop Cart

- Easily moves a laptop around a facility and offers sit-stand height adjustment
- Smaller footprint fits tightly against a wall to free up valuable space

Part number

C50-1100-0

CareFit™ Slim 2.0 LCD Cart

- Compact frame moves all-in-one computers and monitors weighing up to 20 lbs and offers sit-stand height adjustment
- Easily customizable with a broad range of accessories

Part number

C50-3500-0

Neo-Flex™ Mobile MediaCenter

- Present and collaborate anywhere with optimal positioning for both seated and standing audiences
- Move digital content to where you need it
- Easily roll cart through standard-size doorways and over thresholds

Part number

24-190-085 LD (Light Duty)

24-192-085 UHD (Ultra Heavy Duty)

24-191-085 VHD (Very Heavy Duty)

97-491-085 Camera Shelf Kit

Portable batteries

Batteries extend the functionality of non-powered mobile carts. With portable power, devices such as laptops and displays can be used for longer durations, minimizing downtime. Access to safe and reliable power on mobile carts boosts efficiencies in technology-dependent manufacturing environments.

LiFeKinnex™ Battery

- Portable AC power designed to support multiple workflows, including hot swap or on-cart charging
- LiFe battery technology minimizes safety risks and supports more cycles, leading to fewer replacements

Part number

98-246

LifeKinnex™ Smart Battery Dock, US/CA/MX

- User-friendly 3.5" LCD screen displays remaining run time for battery charge checks without being docked
- Quick and easy swapping process with the unique magnetic connection and alignment feature
- Compatible with all mobile workstations via T-slot

Part number

98-247

LiFeKinnex™ 4-Bay Charger, US/CA/MX

- Charger sits on a desk or mounts on the wall
- Battery light indicates the charge level
- Charge up to four batteries at once in under four hours

Part number

98-258

Charging carts

Carts with integrated power store and charge laptops, tablets, and smart devices essential to your workflow. Ergotron carts are designed with redundant safety features to minimize the risk of electrical fires or other hazards and are fully certified and UL-listed to meet industry standards. Whether on the production floor or elsewhere in your facility, carts keep your technology powered up and easily accessible.

YES Basic Charging Cart

- Economical, durable, and flexible
- Store, charge, and transport 36 mini-laptops or tablets with 13" screens

Part number

YESBASGMPW4

YES24 Adjusta™ Charging Cart

- Lightweight and fast charging
- Store, charge, and transport 24 smart devices or tablets, or 16 laptops with 15" screens
- Ability to mount an arm to create a workspace
- Pegboard feature for mounting accessories

Part number

YES24-CHR-1

Fixed point solutions

Great for dedicated work zones that require single or multi-person access to information. Fixed point solutions work by mounting to your existing infrastructure, desks, walls, or posts. They enable immediate access to information and documentation without leaving the work area.

Command Post Computer Mounting System

- Easily add workstations regardless of desk space limitations
- Infinitely configurable with monitor and keyboard arms, CPUs, and workflow-specific accessories
- Compatible with Ergotron's suite of industry leading ergonomic arms
- Heavy-duty paintable steel construction
- Integrated cable management hides cords for an easy-to-clean solution
- Configure with Post, Base, and Brackets
- Small footprint, rugged construction, and versatile floor or ceiling installation places technology within comfortable reach for workers in any environment

StyleView Sit-Stand Combo System

- Work sitting or standing with everything at your fingertips
- Customize to hold a monitor, CPU, wrist rest, mouse, barcode scanner and other workflow-specific devices
- Offers a sturdy worksurface and pull-out keyboard tray, all on the same height-adjustable arm
- Mounts to a wall or command post

Part number

45-270-026

Combo System with Worksurface, medium CPU holder and wall track

45-272-026

Combo System, small CPU holder and wall track
