Rethink and transform security operations with managed XSIAM.

Managed Cortex XSIAM

The threat landscape is ever changing, but the introduction of Artificial Intelligence and automation is rapidly increasing its speed of evolution. Legacy processes with siloed tools can no longer keep up. CDW provides customers with industry-leading expertise, combined with XSIAM's automation-first approach to incident response and remediation. XSIAM consolidates your SOC toolset into a single service, using AI-powered threat detection models and automated response capabilities to improve your security posture, while reducing the cost of maintaining a complex SOC environment.

Managed Cortex XSIAM can help you achieve:

Operational Efficiencies

Cost Reduction

Reduced Risk

Finding the Right Solution

Managed XSIAM Security Services deliver continuous threat protection, risk mitigation and reduction, and security expertise to comprehensively secure your organization. CDW's 24x7x365 Security Operations Centers (SOC) stop never-before-seen threats with a single cloud-delivered agent for endpoint protection, detection and response supported by industry leading service level agreements (SLAs). Some of the advantages of XSIAM include:

- **AI-driven threat detection and prevention:** Cortex XSIAM employs custom AI models and machine learning techniques to detect, analyze and prevent threats within your network

- **Real-time endpoint protection:** CDW's Managed XSIAM provides real-time monitoring and automated protection for endpoints. It can detect and prevent malicious activities, including malware infections, suspicious behavior and unauthorized access attempts.

- **Consolidated SOC capabilities:** XSIAM combines XDR, SOAR, ASM, and SIEM all into one platform, allowing analysts to eliminate console switching and streamline security operations

- **Threat hunting:** The service includes threat hunting, where CDW's security analysts actively search for potential threats and indicators of compromise in your environment.

- **Integration with your existing security platform:** Cortex XSIAM is designed to integrate with both Palo Alto Networks solutions and other select third-party firewalls, XDR products, as well as cloud and edge security devices.

Certifications

CDW has achieved numerous certifications from Palo Alto Networks, including:

CDW + SECURITY

Each new technology in your tech stack has the potential for greater scalability, agility and efficiency — but they also introduce risk. At CDW, we help integrate and secure these systems while keeping your organizational outcomes top of mind.

- CDW employs more than 600 dedicated security coworkers

- Our Managed Security Service Provider (MSSP) program has operated since 2007

- Managed Services are SOC2 and ISO 27001 Certified

- CDW is a Palo Alto Networks Diamond Innovator, an Authorized MSSP Partner and is Cortex XMDR certified

- Our mature process automation leverages Palo Alto Networks XSOAR and machine learning

- We provide customizable engagement models, including dedicated staff support

- CDW has established relationships with top-tier cybersecurity vendors

- CDW's security practice drives $2B in annual revenue

- ITIL processes are supported by a ServiceNow ticketing system and customer portal
