

Cohesity Gaia

AI-Powered Data Insights

Key Benefits

- Create value and insights for the whole company from your backup data
- Generate AI-driven business insights from enterprise data
- Reduce time to action with AI conversational assistant

Key Capabilities for Cohesity Gaia

- AI-powered search, retrieval, and summarization
- Extracting knowledge hidden in your corporate data
- Flexible Deployment: Self-Managed or SaaS-Based
- Natural language questioning and queries
- Private and secure Gen AI for your data

Use Cases

Cohesity Gaia is a great solution for:

- Data insights
- Knowledge management
- eDiscovery and information governance augmentation
- Compliance augmentation

Data Insights with Cohesity

The age of Artificial Intelligence (AI) has ushered in a new era where deep insights and learnings can be unlocked from your data. These advancements mean organizations can get augmented information from their business data using natural language questions instead of data queries. Receive responses from AI that go far beyond traditional data outputs.

Cohesity Gaia

Cohesity Gaia enables organizations to make smarter and faster business decisions by bringing the power of AI and retrieval-augmented generative (RAG) to unlock deep learnings and novel insights from their data.

Whether you need more insights into your organization's compliance posture, need to conduct an eDiscovery exercise, or want to be smarter about prior customer engagements, Cohesity Gaia can unlock value for your organization and transform your data into knowledge.

Improve decision-making speed and accuracy with AI-powered conversational applications powered by high-quality backup data.

- With Cohesity, customers can get more value from their backup data and significantly improve the time-to-value for AI-powered data insights. Since backup data from Cohesity is AI-ready, organizations can support their first AI-powered conversational search experience in minutes or hours instead of the weeks or months needed to develop custom generative AI applications for enterprise data.

Accelerate AI initiatives with a secure, highly-performant AI engine from Cohesity.

- Since Cohesity indexes all backup data, the solution returns context-aware responses in a highly performant way that doesn't use too much compute power. With Cohesity, organizations can power AI without touching production data or needing to make costly replicas of data stored elsewhere.

Streamline compliance and risk management with the ability to responsibly and securely search enterprise data across time with Cohesity Gaia.

- Ask questions and receive human-readable, actionable responses about the data, which contains highly relevant information from historical records and cited documents.
- Users can prompt Cohesity Gaia for additional details, ask follow-up questions, and dig deeper into answers as if speaking directly with a subject matter expert.
- Our granular role-based access controls (RBAC) for backup data helps prevent users from accessing data they don't have permissions for like patient data/PII, trade secrets, financials, and more.

Files and Locations

Unify your unstructured data

Unlock value from all your data sources. Cohesity Gaia works with a broad range of data types across various storage environments—both in the cloud and on-premises.

Search across your data types

Cohesity Gaia can securely search a variety of documents and files—email, PDF, PPT, DOC, TXT, HTML, XML, and CSV—to extract knowledge and create summarizations.

Connect across your enterprise data sources

Cohesity Gaia can securely connect to a variety of enterprise storage types, including Microsoft OneDrive and your NAS storage on-prem.

On-Premises Deployment Options

- HPE
- Cisco
- Nutanix
