

# Increased data movement security with Fivetran Hybrid Deployment

With Hybrid Deployment, security-conscious companies can move all of their data from a single UI, without sacrificing data security or compliance. Meet your enterprise security and performance requirements, without data leaving your environment.

## Hybrid Deployment: modernize with a performant data integration solution that meets your strict security protocols.

Our best-in-class data movement, now with the choice to run security-restricted pipelines in your own environment, with our free Hybrid Deployment.

### Cloud-based control plane

- 700+ connectors with 99.9%+ uptime
- Choice to run pipelines in your environment or Fivetran's secure cloud
- Built-in security and governance features
- Single platform for all data movement needs

### Secure pipelines in your environment

- Data does not leave your environment or VPC
- Pipelines run in your security protocols
- Scale with your existing infrastructure to meet current and future data needs
- No 3rd party data processing

### Scale with flexibility & ease

With Hybrid Deployment and Kubernetes you can easily meet your current and future data integration needs with your existing infrastructure.

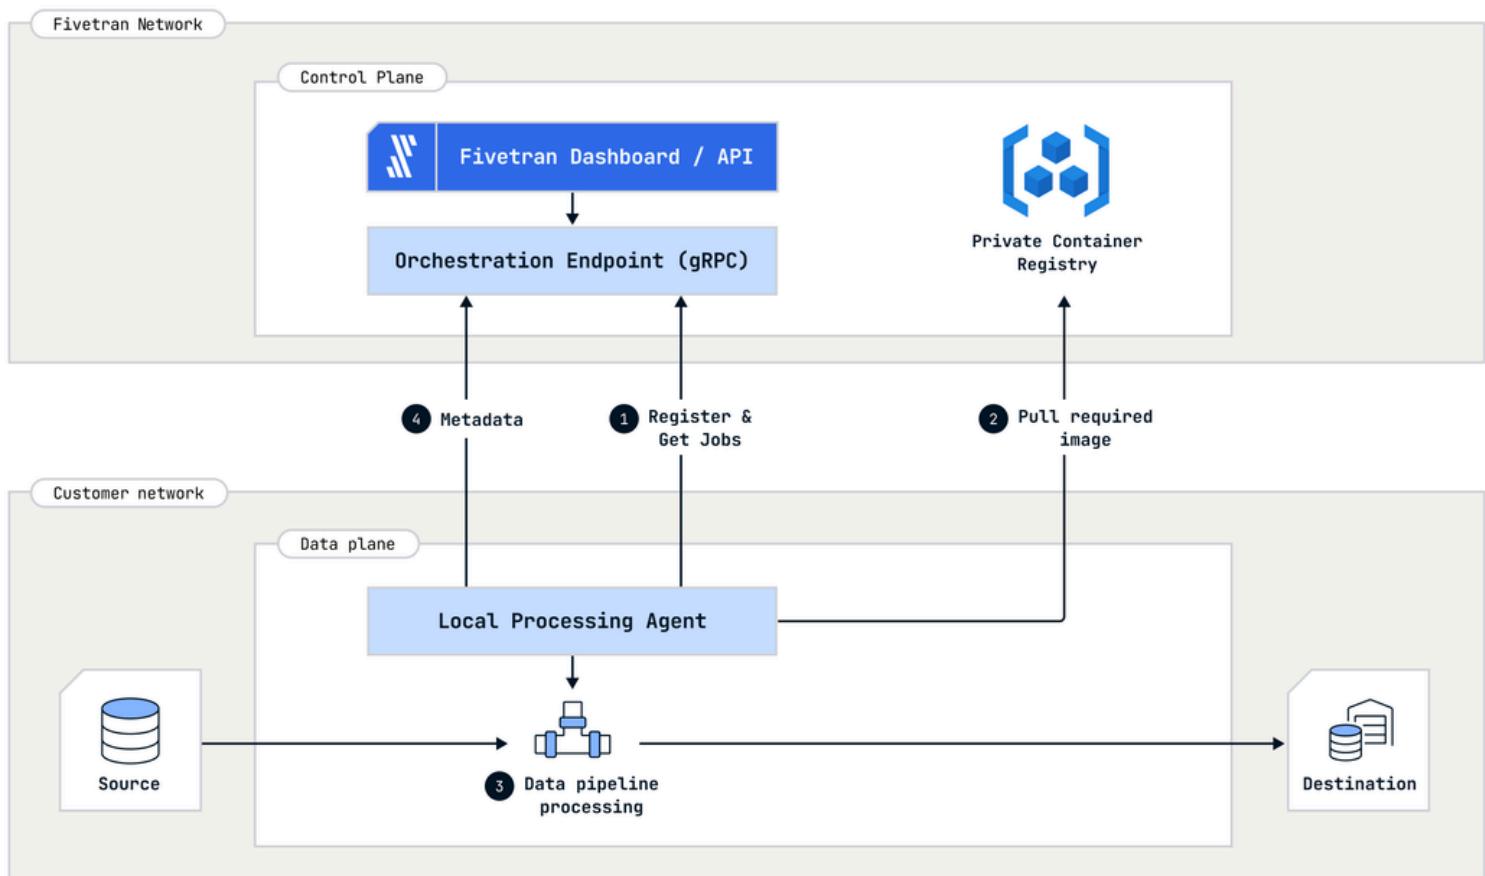

### Move sensitive SAP data

Hybrid Deployment supports SAP ERP on HANA, helping you move business critical data without it ever leaving your secure environment.

### Support for 100s of sources

Centralize data from 100s of sources, without it ever leaving your environment, including databases, ERPs, financial platforms, & more.

# Hybrid Deployment architecture

## Available as a free feature in Enterprise and Business Critical plans

- Secure:** Your data never leaves your secure environment or VPC
- Simple:** Use Fivetran's UI to manage, setup, and QA all of your pipelines, regardless of where they're hosted - no manual maintenance required
- Reliable:** 24/7/365 monitoring & incident response by 500+ engineers
- Choice:** Choose to run less sensitive pipelines in Fivetran's secure cloud

Fivetran's Hybrid Deployment has been a game-changer. Since deployment, we've enjoyed flawless data consistency and timely insights, all while maintaining full control of our infrastructure with little to no maintenance. Fivetran streamlined our operations and positioned us to scale confidently in a dynamic data-driven future.
