SentinelOne

Singularity™ Endpoint

AI-powered,autonomousprotection,detection& response

Endpoints continue to be a primary attack vector and the front door to an organization's network. But attacks are increasingly more automated and difficult to detect. As endpoint and identity attack surfaces converge, legacy and siloed systems can't keep up. Yet despite the expanded scope and complexity, security teams are being asked to do more with less.

Singularity Endpoint is a leading EPP and EDR solution that protects endpoints from advanced, machine-speed attacks. It delivers AI-powered, autonomous protection, detection, and response capabilities in a single agent–across endpoints, servers, identities, and more. Paired with Purple AI, Singularity Endpoint provides radically accelerated triage, investigation, threat hunting and response.

Stop attacks with unmatched protection, detection and visibility

Protect against malware with autonomous prevention, and detect ransomware and zero-days with behavioral AI models that analyze and identify anomalous behavior without human intervention. Get critical alerts with real-time visibility from system-level to identity-based attacks.

Minimize disruption with lightning-fast response and remediation

Use Storyline to link related events, and see the full picture of attacks. Correlate and prioritize alerts across workstations, identities, and exposures. Then remediate threats with automated or 1-click response/rollback actions.

Stay in control with a lightweight, unified agent

Gain comprehensive security with an architecture built from the ground up to provide EDR capabilities and identity protection in a single package. The lightweight, autonomous agent is designed for minimal end-user impact and architected to limit kernel interactions.

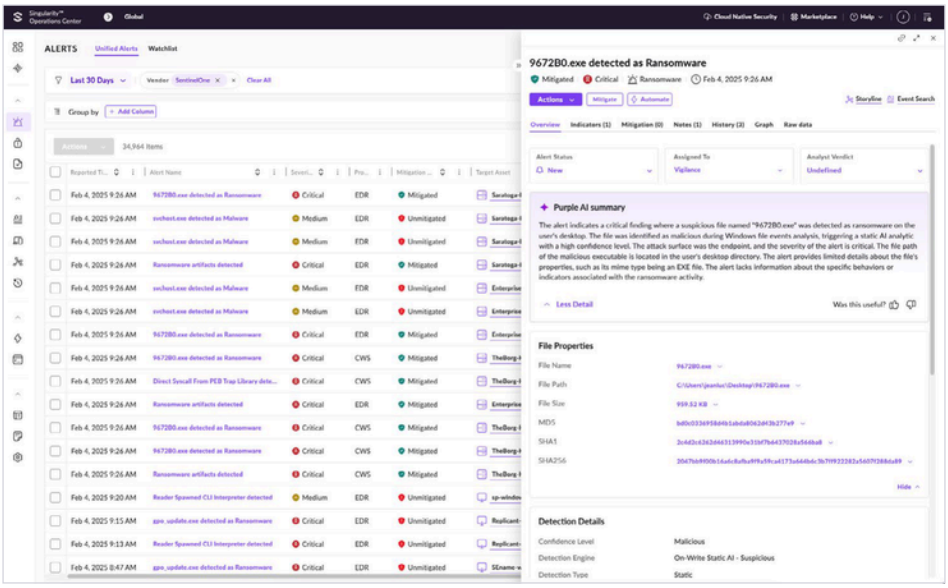
Accelerate your security operations with generative AI

Simplify threat hunting and investigations with natural language querying on first and third-party data. Purple AI accelerates SecOps with hunting quick starts, summaries of results and events, suggested follow-up questions, investigation notebooks, and support.

Key Benefits

- **Protect** endpoints in real-time with AI
- **Detect** threats autonomously
- **Respond** to threats with automated or 1-click response actions

- Behavioral and static AI models protect endpoints from ransomware, and detect suspicious patterns in real time
- Best-in-industry coverage across Windows, macOS & Linux, including legacy OSes like Windows 7, Vista and XP
- Purple AI™, the industry's most advanced AI security analyst
- Patented 1-click remediation and rollback
- Storyline® automatically correlates telemetry to create a visual story for faster investigation & response
- Flexible EDR data retention up to 3+ years
- Mobile endpoint support for iOS, Android and ChromeOS
- Customer-controlled, rebootless Live Security Updates for emerging threats and latest protections



SentinelOne Moves Beyond the Endpoint

AI-Powered Detections

Use superior behavioral AI models to accurately detect suspicious and malicious patterns in real time

Unified Agent and Correlation

Get comprehensive protection against endpoint and identity-based attacks with a single platform

AI-Fueled Speed

Radically accelerate triage, investigation, threat hunting and response with Purple AI

Gartner Peer Insights™

> Our experience with the product has been exceptional. Product capabilities in terms of detection, response, and recovery are best in market.

★★★★★

About SentinelOne

SentinelOne is the world's most advanced cybersecurity platform. The SentinelOne Singularity™ Platform detects, prevents, and responds to cyber-attacks at machine speed, empowering organizations to secure endpoints, cloud workloads, containers, identities, and mobile and network-connected devices with intelligence, speed, accuracy, and simplicity. Over 11,500 customers—including Fortune 10, Fortune 500, and Global 2000 companies, as well as prominent governments—all trust SentinelOne to Secure Tomorrow.
