

WE GET NEEDING TO MIGRATE TO THE CLOUD QUICKLY.

CDW Amplified™ Hybrid Cloud
CDW Managed Services for VMware Cloud on AWS

Through specialized partnerships between VMware, Amazon Web Services (AWS) and CDW, accelerating technology innovation and organizational agility with a cloud-first strategy has never been easier. VMware Cloud (VMC) on AWS is a purpose-built hybrid-cloud environment that leverages native VMware technology, owned by VMware, and managed natively by CDW Services. Design, implementation and operational support are all provided from one trusted partner, CDW.

CDW Managed Services for VMware Cloud on AWS can help you achieve:

-  Operational Efficiencies
-  Reliability
-  Reduced Risk

Managing the Right Solution

Customers today are challenged with two key objectives. They want to migrate to the public cloud quickly, but they are also tasked with modernizing their business applications in order to run them natively, effectively and efficiently in the cloud. VMC on AWS allows organizations to simplify and scale today while retaining the functionality and operational efficiency of their current applications with VMware technology.

With our strategic and technical expertise, CDW will assess, design, migrate and manage your environment in VMC on AWS. Innovate and accelerate your cloud transformation journey with CDW, and experience the outcomes you have been looking for:

- A hybrid-cloud solution that enables public-cloud benefits faster and easier than rearchitecting key business applications
- VMC on AWS, a consistent experience for on-prem workloads and public cloud
- Migrate, protect and scale mission-critical VMware vSphere-based applications utilizing AWS
- Portability to the public cloud while modernizing enterprise apps
- A consumption-based solution, provisioned, supported and managed by a single provider, with options for the level of support you need

With VMC on AWS, you can have everything you need in a strategic solution and partnership: leading technology, a consistent platform experience, consolidated consumption-based billing with unified around-the-clock support from industry-leading account and technical teams — all from one of the most advanced VMware and AWS partners in world.

CDW GETS VMWARE

CDW and VMware have teamed up to bring our leading capabilities together to deliver a truly compelling and differentiated solution featuring VMware Cloud (VMC) on AWS. CDW carries a broad set of capabilities around VMware, including leading cloud, compute, storage and network virtualization capabilities.

Our team of highly skilled engineers has designed platforms, migrations and multi-cloud solutions for organizations of all types and sizes.

Our delivery teams feature VMware-certified engineers, and, as a VMware Principal Cloud Partner, CDW is fully certified to deliver VMware Cloud solutions.

We design, orchestrate and manage customized services and solutions for thousands of customers. Let CDW focus on the IT business, so you can grow yours.

- 11,000-plus customers have bought VMware through CDW
- CDW has earned 21 technical competencies, including Master Services Competencies in Cloud Management, Data Center, Network Virtualization and VMware Cloud
- CDW-badged resources have been working with VMware Cloud on AWS for five-plus years

CDW's full lifecycle of Services can support your business no matter where you are on your journey
