Managing an ever-evolving cloud environment requires specialized skills. Comprehensive next-generation Managed Services for Azure are backed by decades of managed services support experience. CDW’s approach to Azure cloud management allows you to select the service tier (Basic, Essential or Premium) that best supports your business goals and current capabilities. Our approach is flexible and can grow as business needs grow. Enlisting CDW, a proven and trusted partner, can make it easier to keep your business operating optimally.

Managed Services for Azure — Basic can help you achieve:

- **Operational Efficiencies**
- **Reduced Risk**
- **Increased Performance**

### Managing the Right Solution

Take the first step in building and managing your cloud environment. The Basic tier helps you manage your cloud environment efficiently and transparently via one portal. CDW’s portal provides actionable data for cost management, operational management and governance. We can help your business make the most out of your Azure investment. The portal saves you time and money by giving you visibility into your public cloud spending by cost center, department, or business unit. By using Azure tagging functionality, all reporting can be customized to meet your business needs. CDW brings clarity to Azure.

What we deliver with Managed Services for Azure — Basic:

- Multi-Cloud Portal (Azure, AWS, Google)
- Detailed dashboards — predefined or customized views based on the role (finance, development, engineering, etc.)
- Cost, usage and performance reports generated by Azure resource to optimize your cloud costs
- Real-time dynamic reporting
- 13 months of data for trending
- Email based alerting when thresholds are met
- Health Check reports on potential cost savings or improperly configured resources
- Rightsizing reports (VM, SQL)
- Governance policies with automated actions
- Assistance in setting up your Azure environment via our LaunchPad Services
- EA burnout balance
- CIS best practices and recommendations

All of the above features are available in the Essential and Premium tiers.

### CDW Gets Microsoft Azure

CDW is an end-to-end provider of cloud applications, solutions and services for public, private and hybrid cloud environments. We are uniquely qualified to design, deliver and manage a flexible solution tailored to your needs. CDW will help you adopt and integrate Azure securely and efficiently. We have a long-standing, award-winning relationship with Microsoft that we extend to our customers. We get Azure!

### CUSTOMER SUCCESS STORY

**CHALLENGE:** The customer decided to move its infrastructure to the cloud and leverage Azure, but they lacked the experience and resources to manage their costs efficiently and effectively. Over time their costs increased steadily without consistent governance.

**SOLUTION:** CDW designed a tagging strategy which allowed the customer to view by department each resource utilization and cost. We created automation tasks to shut down development resources when not in use to save money, and consulted with the client on how they could rightszie their virtual machines.

**RESULT:** The customer saw instant benefits from the tagging strategy. Each department received custom reports regarding their cloud expenses. CDW helped contain the client’s cloud costs and allowed for organic growth in the cloud.

**SERVICE FEATURES:** This customer used the following Managed Services features:

- Cost Management Portal
