

# Managing your technical assets is critical to keeping things running.

## Hardware Asset Management Pro JumpStart

Organizations large and small need to manage an ever-expanding pool of devices, tracking and monitoring them from the time of their purchase through their deployment and operational lifecycle, and up until they reach retirement. The critical responsibility of asset management can be arduous. Fortunately, CDW has a solution to make it easier for your organization.

The Hardware Asset Management Pro (HAM Pro) JumpStart is an eight-week, start-to-finish HAM Pro implementation that leverages key out-of-the-box functionality, combined with best practice guidance, to jump-start your organization's time to value.

CDW's HAM Pro JumpStart can help you achieve:

**Operational Efficiencies**

**Increased Performance**

**Reduced Risk**

### Finding the Right Solution

This is a cost-effective approach that leverages pre-packaged experiences to accelerate your organization's ability to begin realizing value from HAM Pro functionality. With interactive workshops and continuous improvement efforts included, the CDW approach is a comprehensive program that provides quick results with effective use of resources.

HAM Pro JumpStart benefits include:

- An overview of the ITAM Lifecycle Management methodology and elements, and their interactions with other aspects
- Key core HAM Pro setup to include out-of-the-box functionality related to asset tasks associated with Stockrooms, Asset Orders, Bulk Stock Orders, Disposal and Asset Tasks (Deploy, Swap, Retire)
- Integrations with Service Graph Connector for SCCM, as needed
- Process and technical guidance
- Enablement and knowledge transfer

CDW's full lifecycle of Services can support your organization no matter where you are on your journey
