

WE GET A GOOD CYBERSECURITY PRACTICE REQUIRES A WELL-PLANNED IRM PROGRAM.

CDW Amplified™ OS
Integrated Risk Management JumpStart

CIOs and CISOs are always being challenged to invest in building strong information security and cybersecurity controls. Auditors require evidence that proves security controls are in place and will be working directly with IT and security to gather this evidence quickly. Integrated Risk Management (IRM) helps define control requirements and perform risk assessments against the cybersecurity framework. IRM can help CIOs and CISOs define and update controls and risks to gather evidence into a system of record.

CDW's Integrated Risk Management JumpStart can help you achieve:

 Operational Efficiencies
  Reduced Risk
  Agility

Orchestrating the Right Solution

Best-practice configuration ensures efficient upgrades, optimal usability and performance, and ease of maintenance. CDW solution architects utilize ServiceNow's HealthScan technology to compare your existing system configurations against ServiceNow best practices and make recommendations on improvements and upgradability.

CDW now offers IRM JumpStarts for Policy and Compliance Management and Risk Management that set up a compliance programs for CISOs and CIOs to immediately use to submit evidence or perform risk assessments and prove that cybersecurity controls are in place. Auditors will be able to see the status of all controls and view evidence within each control, or see the output of completed risk assessments and view what controls are in place that help mitigate the risk.

CDW can implement the IRM Policy and Compliance or Risk Management JumpStarts in an eight-week project that also includes an instructor-led, hands-on training course that ensures a rapid adoption to learn how to manage the platform.

Some of the benefits you can realize with an Integrated Risk Management JumpStart include:

- Best-practice configuration for managing policies, controls, risks and issues
- Expert evaluation and alignment of cybersecurity compliance requirements
- Instructor-led process training that includes hands-on lab exercises

CDW's full lifecycle of Services can support your business no matter where you are on your journey
