Orchestrating the Right Solution

This high-energy, “gamification-style” workshop is used globally by executive teams of Fortune 500 organizations and government departments. Participants are given roles in a sub-optimal business unit in which they have to respond to real, everyday challenges and transform processes and underlying technology that meet the needs of the business. Results improve as each round concludes. Participation from your entire team ensures the best results.

Benefits You Will Receive:
- Identify in real time how political, business, process and technology issues intermingle and affect overall business results.
- Directly experience the increased efficiency yielded by process improvement.
- Achieve better alignment between leadership and staff as it relates to both process and internal cooperation.
- Learn to work better together as a team so that projects succeed (unlike widely reported industry failure rates of between 60–70 percent).

CDW’s full lifecycle of Services can support your business no matter where you are on your journey

Design → Orchestrate → Manage → On-Premises → On-Journey → Cloud-Based

What Our Customers Say
“Your team has been a great pleasure to work with during our transition to ServiceNow.”
– Cindy (Restaurant Franchise Company, Independence, OH)

“Excellent expertise and focus on exactly what needed to be done, and delivered.”
– Paula (Investment Company, Boston, MA)
**Deliverables Checklist**

During this interactive workshop, participants are divided into four business units of a fictitious company and face simulated “incidents” they must resolve to maintain SLAs and profitability.

At the end of each of the three rounds, they review results and are guided to adapt their approach using ITIL-based best practices. By round three, dramatic improvements are seen in service delivery and the impact they have on the business as a whole. The improvements are discussed in the context of organizational application.
