WE GET
STATE AND LOCAL GOVERNMENT IT.

To optimize operations, you need IT Orchestration by CDW-G.

CDW-G’s Comprehensive State and Local Government Expertise

From prioritizing cybersecurity and public safety to modernizing data infrastructures and future-proofing technologies, finding the right state and local IT solutions can be daunting. CDW-G can help you implement the right technology solution to meet your agency’s mission and goals. Including the delivery of clear, fast, secure, and dependable public services.

Our dedicated account managers have the specialized expertise to understand your unique IT challenges, assess your infrastructure needs and strategically lay the groundwork for comprehensive organizational transformation.

We’re a trusted technology partner with extensive experience working with an array of state and local government industries. We make common technologies easy to use, enabling you to quickly and effectively build a digital government.
The CDW-G Approach

Optimizing and modernizing IT infrastructure has become a necessity for state and local government agencies. CDW-G makes the process easy and efficient with our full life-cycle approach. We begin with a deep-dive assessment, during which our experts take an exhaustive look at all levels of your organization to identify your specific IT needs.

Expertise

CDW-G’s dedicated state and local government teams specialize in disciplines that range from data to public safety. In addition to their years of experience, the experts in each area have the product- and solution-specific certifications needed to ensure the highest levels of expertise and support.

Dedicated teams include:

- Account managers
- Solutions architects
- Technology engineers

Continuous Operations

- Managed Services NPS 60+
- Service Desk 6+ Languages
- 550+ Coworkers
- 6 Operations Centers
- 24/7 Coverage

Desired Outcomes

- 250,000 customers recognize CDW as their expert partner

Proven Quality

- 10,000+ Certifications
- Delivery to 157 Countries
- 6,000 Projects
- Professional Services NPS 70+
- 26 U.S. Cities, 10 International locations

Trust at Scale

- 4,500 expert sellers
- 500 Field Sellers
- 900 Solution Architects
- 1,000 Consultants and Engineers
- 300 Software Engineers
- 1 Million+ Sq. Ft. distribution space
- 10,000 configurations per day

Unmatched Expertise

- 20+ Partner Early Field trials
- 1,200 Solutions Partners
- All industry verticals
- Full-stack hybrid cloud
- 50+ Partner Advisory boards

Full Stack. Full Lifecycle. Full Outcomes.

Data Center Optimization

State and local government agencies must optimize and consolidate their data in order to better serve their constituents. Applications need to scale rapidly, and users need fast, easy and secure access to resources and services that might exist across multiple agencies. Executing those requirements successfully requires the kinds of data center optimization skills that CDW-G specializes in.

Our team can help you optimize and modernize your data center in order to ensure that its IT infrastructure can handle changing workloads and evolving organizational needs. And CDW-G’s life cycle approach allows us to provide you with ongoing scalable, full-stack data center managed solutions.

Converged and hyperconverged infrastructure
Update your legacy infrastructures with a modern solution that is easier to install, scale and manage.

Data storage and backup
Implement modern data storage solutions, along with a data backup and recovery strategy to protect critical information from loss.

Software-defined networking
Enable next-generation capabilities for your network to improve security, efficiency and flexibility.

Virtualization
Leverage your physical assets using the latest virtualization and software-defined technologies.

Containerization
Improve infrastructure agility and enhance both cloud and data center performance to provide Infrastructure as a Service.

Data center power and cooling
Increase resiliency of your data center equipment by preventing downtime and ensuring that your data center keeps running even if disaster strikes.

Cybersecurity

CDW-G is the largest security technology integrator in North America.

State and local agencies face a series of challenges when it comes to their cybersecurity infrastructure, from budgeting constraints to complex solutions that span multiple technologies and environments. CDW-G offers an expansive set of solutions and services to overcome any of these challenges.

CDW-G has designed a deep-dive assessment that measures your network, applications and endpoints. The assessment helps us thoroughly understand your threats and weaknesses so we can design end-to-end solutions that can deter, detect and manage the latest threats.

Our dedicated experts are with you from assessment through implementation and management. We support your team with any issue that may arise or with any concern you may have along the way. Whether you need the latest security technology, expert advice or a strategic partner, CDW-G has the right solution for you.

Infrastructure security
Whether your organization relies on cloud-based security or a hybrid model, CDW has you covered.

Data and applications security
We have a wide range of solutions to ensure that you are able to detect, mitigate and recover from any possible threat or attack.

Zero trust
We offer a fully integrated security infrastructure for your organization with 24/7 monitoring.

Identity and access management
CDW can provide a robust identity management solution that includes a multi-layered security strategy and approach.

Cloud security
CDW’s Cloud Security Posture Management (CSPM) solutions help organizations address potential liabilities related to visibility, configuration, compliance, and ongoing management of the cloud environment.

Proven Service-Level Agreements (SLAs)
Industry-leading performance against SLAs means predictability, continuity, and agility.

End-to-End Service
Everything you need, from one vendor. Less risk, less paperwork, less hassle.

Unmatched Expertise
The broadest and deepest security skill sets in the market.

500+ security professionals
150+ vendor partnerships
300+ managed services professionals
40K+ security solutions delivered
100+ IAM specialists
15K+ industry-trained security professionals

Transformational Government

State and local governments need to optimize and modernize their digital services to keep up with the demands of the times. There is an overwhelming number of options, and choosing the right ones can feel like an impossible task.

CDW-G is here to ease the process of transforming your IT infrastructure.

**CDW-G Solutions offerings include:**

- Application Modernization Assessment
- Adobe DX
- Staff Augmentation

CDW-G understands that there are many requirements and constraints when making your IT decisions. We have extensive state and federal compliance experience and are able to satisfy all of your regulatory requirements.

**Regulatory Compliance:**

We have experts who work exclusively on transformational government solutions, can guide you through the entire process, and will be with you to provide 24/7 support.
Public Safety

Public safety agencies provide the most mission-critical services of state and local government. Every aspect of the services provided to constituents needs to be optimized to offer the best outcome under the most demanding conditions and time-critical situations.

The CDW-G Public Safety team has solution-specific expertise to optimize, modernize and harden the systems that support and enable your public safety agencies. Our experts will guide you through all the essential requirements, policies and strategies to ensure that you have the most effective—and cost-effective—solutions for these critical systems.

Public Safety focus areas:

Mission effectiveness: Digital transformation yielding force multiplication, force protection, and delivering more rapid positive outcomes.

Digital workspace: Creating a better user experience while streamlining device management and improving access to information.

Command control and intelligence: Enhanced situational awareness, data correlation, and decision support systems combined to aid in visualizing common operating situations.

Solutions for Public Safety include:

Cyber and physical security – Cyberthreats are constantly emerging and evolving. As a result, a comprehensive approach to protect against today’s advanced threats is required.

Communications infrastructure – Technologies and services supporting mobility, radio backhaul and ESI Net.

Data visualization and analytics – Enhancing data-based decision making with platforms that enable asset & inventory tracking, evidence management, work management and records management.

Surveillance platforms – Observation technologies help create surveillance & recognition platforms to gain insight, hindsight, and foresight.

Virtual desktop and application delivery – Create a universal interface across disparate platforms.

Mission-critical operation center – Professional Audio/Visual systems designed and integrated to operate in 24x7x365 Mission Critical Environments.
Partnerships

Contracts and Partnerships

State and local government agencies face daunting challenges when looking for a solutions and services provider.

CDW-G understands that you must meet the needs of the organization while also fulfilling regulatory compliance demands. Our customized contracts can include anything from individual products or services to complete, complex solutions.

Partners

Through our extensive partnerships we can ensure to meet any Diversion, Equity and Inclusion standards and offer a variety of solutions or services that address the full range of data, security, public safety, or transformational issues.

1,000+ Best Partners in the IT Industry
