

# Apple MDM Fast Track Implementation

## SERVICE OVERVIEW

CDW will work with your team to implement the preferred mobile device management (MDM) system, such as Jamf Pro, Jamf School or Intune, for managing MacBooks, iOS and iPadOS devices. The focus is on completing Automated Device Enrollment, app deployment and configuration setup following Apple best practices, ensuring devices are supervised and integrated with your Entra environment per Microsoft and Apple guidelines.

## SERVICE FEATURES

- **Zero-Touch Enrolment & Deployment:** Automate the onboarding of new Apple devices through integration with Apple Business Manager (ABM) for zero-touch setup. Devices are enrolled and configured until the moment users activate them.
- **Improved Security & Compliance:** Enforce baseline security settings (e.g. passcode policies, FileVault encryption for macOS, Wi-Fi and certificate profiles, etc.) and ensure devices are properly supervised and compliant with corporate and regulatory standards.
- **Faster Time to Productivity:** Pre-load essential apps (via Apps and Books/Volume Purchase Program and packaged apps) and settings so end users can be productive immediately. This reduces manual setup work for IT and avoids configuration errors.
- **Expert Guidance & Knowledge Transfer:** Gain hands-on guidance from CDW's Apple mobility specialists. The engagement includes knowledge transfer sessions and documentation, empowering your IT team to manage the MDM environment confidently after project completion.
- **Flexible to Your Needs:** Whether you're a school deploying iPads or an enterprise managing MacBooks and iPhones, the service is adaptable. (For education clients, Jamf School may be used for a simpler interface tailored to classrooms, whereas Jamf Pro suits more complex requirements. If you already use Microsoft 365, Intune can be configured for seamless Entra ID integration.

## DELIVERABLES

- MDM system that is now ready to add users and devices to your environment
- Working files that were created (scripts, configurations, etc.)
- Knowledge transfer session
- Build document

## EXCLUSIONS

- Disk data destruction/erasure for any and all data
