

Nutanix NC2 on AWS

Infrastructure/Cloud

SERVICE OVERVIEW

Are you worried about rising costs in your current cloud environment? CDW's Nutanix NC2 on AWS offers a flexible, cost-effective alternative, allowing you to leverage a familiar solution trusted by infrastructure professionals for years.

This option provides agility for handling bursts during peak times without the restrictions of long-term commitments. Additionally, using well-known management interfaces means your teams can quickly adapt and effectively manage their workloads, maximizing the value of existing skill sets.

SIMPLIFY YOUR CLOUD TRANSFORMATION

If you've ever wondered, "Why doesn't all of this stuff just automatically work together?" the answer is, "It does with CDW and Nutanix." There's no reason for your team to spend time learning how to launch a storage instance across multiple clouds. With their hyperconverged infrastructure (HCI), CDW and Nutanix abstract away hundreds of cloud activities like "launch an instance" with a single click of a button. Not only does this accelerate your ability to do work in the cloud, but it also eliminates a lot of the effort spent on "Stuff that should just work." That means your people can focus on conversations like, "Does our cash management application perform better on-prem or on AWS?" rather than telling your business, "It's going to take us four weeks to figure out how to move the data; we'll update you soon."

SERVICE FEATURES

- Deployment of the NC2 cluster in AWS
- Configuration of the migration tools from on-premises to the NC2 cluster
- Documentation

PRE-REQUISITES

- An AWS landing zone
- Valid backups of the current environment
- Access to the on-premise environment

EXCLUSIONS

The migration isn't covered except for five virtual machines (VMs) to ensure everything works. This could be included as an add-on.

WHY CDW AND NUTANIX?

As a partner specialized in Nutanix, our deployment practice is approved and vetted by Nutanix. And to make sure that you get a vendor-supported environment, we're using the requirements they have on how to deploy it.

CERTIFICATIONS

- CDW is a Premier AWS Partner and a Nutanix Professional Partner
- CDW has over 300 AWS-certified resources and 50 Nutanix-certified resources
