

AWS CLOUD PENETRATION TEST

RISK ADVISORY SERVICES

UNCOVER YOUR AWS CLOUD ENVIRONMENT'S VULNERABILITIES

CDW's Cloud Penetration Testing Service is used to discover, identify and classify potential deficiencies and vulnerabilities in organizations' AWS Cloud environments; and help assess the related security posture. CDW Cyber Security consultants would attempt to identify and exploit vulnerabilities to simulate a malicious actor, and then provide recommendations to remediate issues.

BENEFITS AND FEATURES

- Delivery completed by highly trained and experienced CDW penetration testers
- Identifies security vulnerabilities in your cloud environment and tests readiness to withstand a real-world cyberattack
- Assigned project manager for each engagement
- Quick and affordable service

DELIVERABLES

- Completion of penetration testing activities
- A final report containing:
 - An executive summary of work carried out and results of the test
 - A review of the test findings
 - A review of remediation recommendations

CDW'S SECURITY APPROACH

Our risk-based approach to security is based on the NIST Cybersecurity Framework, which allows organizations to achieve their ideal security posture. We work with you to:

PREPARE

We help our clients create and align strategies and programs to address ever-evolving business risks. This includes creating a relevant and achievable security roadmap.

DEFEND

We work collaboratively with clients to decide which technologies to implement to protect against cyberthreats.

RESPOND

We monitor critical business assets, respond rapidly to incidents and validate the effectiveness of security controls 24x7x365, so you don't have to.

WHY CDW RISK ADVISORY?

CDW is uniquely qualified to provide high-quality services specific to this engagement.

- **Depth of Experience**
 - Extensive experience conducting network and infrastructure penetration tests in complex and highly sensitive environments. We have been doing penetration testing for over 12 years.
- **Continuous Improvement**
 - We invest in our people: training them in the latest techniques to keep up with North America's changing threat landscape.
- **Breadth of Experience and Knowledge**
 - We've done testing in all industry verticals across North America and bring you the knowledge of all our resources. Not just the resource is working directly with your organization. Our consultants hold the following designations: OSCP, OSCE, OSWP, OSWE, CRTP, CEH, CISSP, RHCE, RH413, GSEC, eJPT, eWAPT and eWPTX.
- **Security Experts**
 - Our consultants have experience in aiding different sized organizations; meaning we can help design security controls and processes that are tailored to your organization. All of our security consulting and testing resources are based in Canada.
