CLOUD SECURITY POSTURE ASSESSMENT

Security

MANAGE YOUR CLOUD SECURITY POSTURE EFFECTIVELY

Are you concerned about the security of your workloads in AWS, Microsoft Azure, or Google Cloud? Want to ensure your environment is compliant with frameworks like NIST, CIS, PCI–DSS, HIPAA, GDPR and more?

CDW Canada's Cloud Security Posture Assessment provides visibility, analysis and recommendations so you can take immediate action to address misconfigurations in your public cloud(s).

We analyze findings from an industry–leading cloud security solution to help you prioritize next steps for remediation. At the same time, you get to test–drive how that solution can continuously monitor and manage your cloud's security posture. Contact your CDW account manager or **sign up here** to get started!

WHAT YOU GET

- Roadmap to highlight findings
- Access to download a report
- Time with the experts
- Recommendations on what findings to prioritize from your dedicated CDW cloud security team
- Guided trial of cloud security posture management solutions in your public cloud environment(s)
- Follow–on paid support options for remediation and more cloud services

BENEFITS

- Visibility – whether you are single or multicloud (AWS, Microsoft Azure, Google Cloud)
- Numerous compliance framework reports to export
- Pair with your annual penetration test for added value

PROCESS

1. Sign up online or reach out to your CDW account manager.

2. Join a brief kickoff call with your assessment lead.

3. Onboard to your cloud security posture management solution. Support provided.

4. Join your out brief presentation call to learn findings and recommendations.

5. Log into your solution to export desired reports and explore further.

6. Work with the solution architect to understand the remediation plan

CDW
