Carbon Black.

INTRODUCING CDW THREAT CHECK

CDW Threat Check brings together the power of Cisco, Tenable, Splunk and Carbon Black to expose insecure systems and possible malware on your network. It utilizes the next generation of security tools to actively monitor and report on malware, signs of external intrusions and other security vulnerabilities in an easy–to–deply package. This complimentary service provides tangible evidence and documented support to help you build a case for a more proactive approach to security.

HOW IT WORKS

Build on a defence–in–depth architecture, CDW Threat Check detects malware in three steps:

➕ ACTIVE NETWORK MONITORING

- Monitors for malicious traffic and endpoint threat activity
- Identifies malware and bot activity, as well as risky Internet usage

➕ INSECURE SYSTEM DETECTION

- Identifies unpatched devices, in addition to insecure protocol use and configurations
- Verifies your patching systems

➕ HOLISTIC ORGANIZATIONAL GUIDANCE

- Reviews current security controls and organizational practices
- Provides actionable reporting
- Accesses CDW security experts

THE BENEFITS

CDW Threat Check goes beyond malware identification, providing guidance for threat remediation and a whole lot more:

EASY TO DEPLOY

CDW Threat Check is managed by us, so it won't drain your time or resources. You configure your switch, install the device and participate in kickoff and result review calls. We do the rest.

PRACTICAL

CDW Threat Check identifies active malware and attacks – as well as risky behaviours, such as webmail and Internet file sharing — to help provide concrete justification for information security program improvements and help garner CIO support.

NONINTRUSIVE

CDW Threat Check monitors your network traffic in an active, nonintrusive way, so it won't disrupt or seize your data and can be wiped after use.

ENTERPRISE–CLASS SECURITY TOOLS

Get an opportunity to experience cutting-edge security products on your own network with the Guidance of CDW Threat Check engineers to navigate tools, identify issues and interpret results.

EXPERT NO-PRESSURE ADVICE

Get an opportunity to experience cutting-edge security CDW Threat Check engineers will help you to review your organization's current security products, practices and procedures to identify improvements to your malware prevention and response posture, without sitting through a sales pitch.

DECADES OF EXPERIENCE

Get an opportunity to experience cutting-edge security CDW has maintained a security practice of experts, ranging from product specialists to penetration testers, since 1998. We get security!
