

# Experiences Are Everything

Your guide to enabling  
work everywhere.

# Your business doesn't stop at the endpoint. Why should your IT experience?

There are important people, places, and things that require connectivity, safety, and intelligence to be successful. We call them touchpoints.

At Meraki, everything we do is structured to optimize experiences. We add smarts to your places and things, creating actionable insight for your people.

# Are you a:

**Technology executive  
or professional?**

**Facilities  
manager?**

**Security  
professional?**

**Human resources  
leader?**

**Line-of-business  
manager?**

Whatever your role or responsibilities, your teams can use the same processes and technologies to deliver the same seamless experiences—whether employees are in the office, the field, or at home. In fact, it does not make a difference where they work.

The Meraki platform makes it easy for you to build new experiences that transform how people connect, how everyone and everything is secured, and how processes are automated.

Your technologies are streamlined on the cloud-first Meraki platform. Deliver physical and digital security and see intelligent insights and analytics for all your network infrastructure on a single dashboard.

# With Meraki you can:

Evolve your network

Connect your  
hybrid workforce

Collaborate with  
remote teams

Provide safe and  
secure environments

Power smart spaces

Deliver smarter  
work experiences

# Smarter work experiences start here

Employees want to use the same tools and processes, regardless of where they work. Employers are expected to provide conditions that promote productivity and collaboration. And IT teams have to keep it all running.

That's why Meraki technologies include:

## RAPID-FIRE SECURITY

so configuring and connecting Meraki VPNs takes no time at all

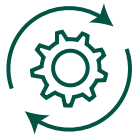

## REAL-TIME MONITORING

for visibility and transparency across the network and devices

## AMP UP NETWORK ANALYSIS

with Meraki Health, remediating issues before they become trouble tickets

## AUTOMATE PROVISIONING

via Systems Manager to speed up onboarding

## GIVE COMPLETE TRANSPARENCY

into network performance and potential problems with Meraki Insight

## DELIVER NEXT-GENERATION WI-FI

and optimized connectivity across locations and campuses

# One big partner ecosystem for mega results.

The Meraki Marketplace features hundreds of partners ready to help you build smart spaces and safe places, plus enable hybrid workplaces and remote workforces.

## WORKING WITH PARTNERS, ORGANIZATIONS CAN:

- Operate sensors to [save downtime](#)
- Centrally deploy technology to new remote and hybrid team members with just [three clicks](#)
- Map [office efficiency](#) to maximize space usage
- Leverage cameras and sensors to safeguard assets from [theft or flood](#)

# Hybrid work

Empowering teams to work where and how they want is a regular business practice today.

Meraki technologies:

- Secure devices and data at scale, with automated provisioning and policy enforcement using Meraki Systems Manager
- Provide complete transparency across all networks' performance and status with Meraki Insight and Meraki Health
- Give remote and home-based employees the power of corporate-office connectivity with Z3 teleworker gateways

HYBRID WORK

- Securing devices and data at scale with policy enforcement and automated provisioning with Systems Manager
- Enhancing productivity with MR access points in corporate offices and Z3 gateways at home
- Crafting smart spaces with MT sensors and MV cameras
- Remediating network issues before they impact employees, thanks to the network-analysis insights Meraki Health provides

MR ACCESS POINTS

MT SENSORS

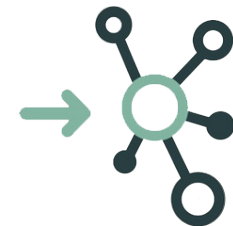

MV CAMERAS

MARKETPLACE PARTNERS

Enforce integrated zero-trust security for all users, devices, and applications.

Streamline and automate troubleshooting of on-site and remote workers.

# Remote work

Creating office experiences, however far from corporate headquarters team members actually may be.

Meraki technologies:

- Protect next-generation Wi-Fi across devices and miles
- Deliver sophisticated security without complicated setup or training
- Feature built-in network analysis so IT pros can remediate any issues before employees send help-desk tickets

REMOTE WORK

- Ensure remote employees are productive with secure and reliable connectivity via the Z3 teleworker gateway with cellular backup
- Safeguard apps and data with Cisco Umbrella cloud security
- Ease setup and troubleshooting for remote staff by retaining full access and control of connected devices via Meraki Systems Manager

TELEWORKER GATEWAY

SYSTEMS MANAGER

MARKETPLACE PARTNERS

Integrate and customize alerts from Meraki to immediately inform key teams.

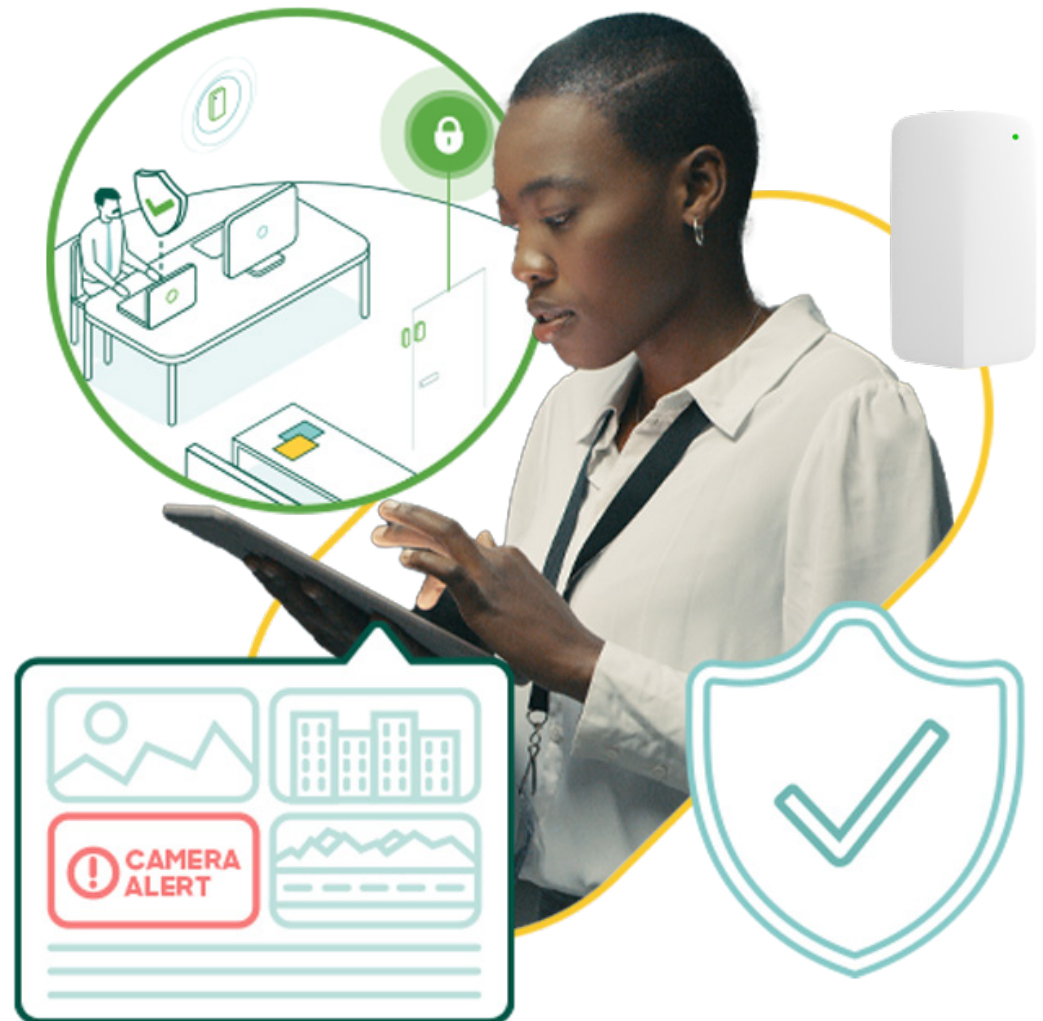

Intelligently automate and orchestrate network security policy management to make organizations more agile, secure, and compliant.

# Safe environments

You can use your communications infrastructure to help protect your greatest assets—your people. That's why Meraki technologies:

- Use out-of-the box analytics for people and vehicle detection
- Offer custom models for advanced usage capabilities
- Anonymize people data, so individuals cannot be tracked by facial recognition or analysis

## SAFE ENVIRONMENTS

- Use out-of-the-box analytics in MT sensors for people and vehicle detection
- Simplify setup with automatic connectivity with MR and MV gateways, then manage environmental sensors and IT networks on one dashboard
- Anonymize people data, so individuals cannot be tracked by facial recognition or analysis

**MT SENSORS**

**MR ACCESS POINTS**

**MV CAMERAS**

## MARKETPLACE PARTNERS

Provide access control for the physical world.

Create an inventory of everything on your infrastructure.

# Smart spaces

Smarter buildings and workspaces are the future. Meraki technologies:

- Help meet sustainability initiatives with MT sensors and MV cameras
- Overcome the complexity of integrating physical and network assets into one point of control, the Meraki dashboard
- Eliminate time-consuming manual processes for policy enforcement and device provisioning

SMART SPACES

- Improve insight into footfall traffic with heatmaps from MV smart cameras, MR access points, and applications from the Meraki Marketplace
- Reduce environmental impact with MT sensors for real-time visibility and alerts
- Deliver seamless connectivity via the Meraki MX
- Meet ordinances like occupancy limits with security devices like MTs and MVs and Meraki Marketplace apps
