

Unlock insights and transform business faster with AI

Reimagine the speed of business with cutting-edge AI innovation and scalable AI workflow automation

AI, Generative AI and now Agentic AI is reshaping markets and industries globally. With its ability to create original content from data, GenAI is democratizing AI access so that organizations of all sizes and technological capabilities can access AI innovation to deliver solutions and use cases that leverage your data.

Transform insights into value

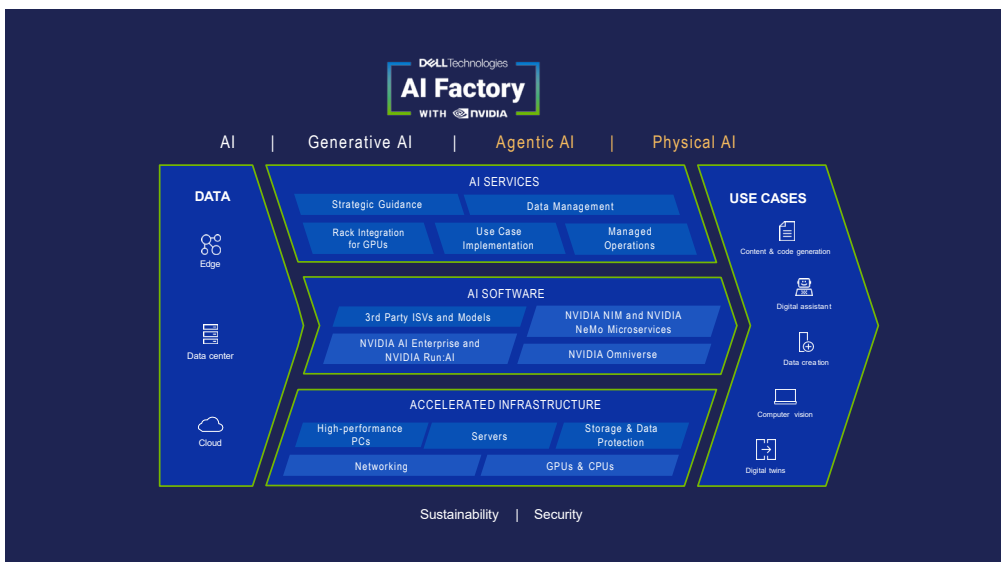

AI starts with identifying and aligning business objectives with the right solutions at scale. With a clear strategy, the organization can prioritize data sets and use cases that accelerate business outcomes and decision-making. AI Use cases unlock data insights, improve productivity, redefine the customer experience, and accelerate innovation. For example, for an organization with strategic goals of increasing profits, introducing innovative products and services, and improving customer experience, the top three use cases for GenAI would be coding support, content creation and digital assistants. Here are the use cases Dell Technologies supports:

Simplify the deployment of your most important AI uses cases with Dell solutions and tailored services.

Turbocharge AI adoption

Accelerate your AI journey and securely transform your data into insights with the industry’s first comprehensive, turnkey AI solution. **The Dell AI Factory with NVIDIA** addresses the complex needs of enterprises seeking to leverage AI and GenAI. With leading infrastructure –from desktop to data center to cloud– and services together with AI software deployed across your organization, you can decrease time-to-value for your outcomes by simplifying development and deployment. **Dell Technologies and NVIDIA** have a long-standing partnership with **more than 25 years of joint innovation**, focused on accelerating transformative results for customer outcomes and applications.

Bring AI to your data with the Dell AI Factory with NVIDIA

- Transform your **data** into insights that scale. Data is the raw material that powers the Dell AI Factory with NVIDIA. Bring AI to where data resides to minimize latency, lower costs, and maintain data security by keeping sensitive information within a controlled environment.
- Accelerated infrastructure is AI optimized for your operations and environment. Run AI with the broad Dell portfolio from desktop to data center to edge including **Dell PowerEdge and Pro Max with NVIDIA GPUs & CPUs, PowerScale, Dell PowerSwitch and NVIDIA Spectrum-X** networking.
- AI Software delivers a cloud-native software platform offering best-in-class developer tools, frameworks, and pretrained models for AI practitioners, with **NVIDIA AI Enterprise, NVIDIA Run:AI, Omniverse, NIMs and models**.
- **Dell Services for the Dell AI Factory with NVIDIA** help organizations of all sizes get started with AI—accelerating strategy, to achieve business results faster while minimizing security risks.

Fast-track AI to production - from desktop to data center with a consistent framework

Infrastructure is the foundation of the AI factory. Right-size your AI investment with the flexibility to run your workloads anywhere through the broad Dell AI portfolio from desktop to data center. Quickly get up and running and give your teams hands-on experience with a local prototype environment. Start building organization skills with a clear understanding of data pipelines and business processes, enabling you to seamlessly scale as your needs grow.

Partner with Dell Technologies and NVIDIA to unlock the full potential of GenAI

Rapidly start delivering organizational value with Dell AI Factory with NVIDIA with these two ways:

- Strategic planning with an **Accelerator Workshop for Generative AI**: Start your journey by developing a winning strategy with a fee-waived half-day workshop. Address challenges and gaps, prioritize objectives and identify opportunities.
- Technical preparation. Jump-start your journey to success with an easy-to-use mobile lab — including a **Dell Mobile Workstation and two days of Consulting Services** to help get you started.
