

Microsoft Introduces the Frontier Suite

A NEW ERA OF ENTERPRISE AI BUILT ON INTELLIGENCE AND TRUST

Microsoft has announced Microsoft 365 E7 – The Frontier Suite, a new top tier offering designed to help organizations move from AI experimentation to secure, enterprise wide execution. Built for the agentic AI era, the Frontier Suite brings together intelligence that understands real work with the governance and security required to scale responsibly.

WHAT IS THE MICROSOFT FRONTIER SUITE?

Microsoft 365 E7 is the first Microsoft suite purpose built for organizations ready to operationalize AI across their business – not just pilot it.

At its core, E7 unifies:

- Microsoft 365 Copilot (Wave 3) with deep, contextual AI embedded directly into Word, Excel, PowerPoint, Outlook and Teams
- Agent 365, the new control plane to observe, govern and secure AI agents
- Enterprise grade security, identity and compliance across Entra, Defender, Purview and Intune

Together, these capabilities enable what Microsoft calls Frontier Transformation – where humans and AI agents work together, securely and at scale

TWO PILLARS: INTELLIGENCE + TRUST

Microsoft is clear: AI cannot scale without trust.

Intelligence

- AI grounded in Work IQ – your organization's real data, context and collaboration patterns
- Multimodel flexibility, leveraging best fit AI models for different workloads
- Agents that understand how work gets done, not just how to generate content

Trust

- Built in observability of AI and agent activity
- Identity aware agents governed through Microsoft Entra
- Data protection, compliance and security controls embedded by design

This combination allows organizations to confidently expand AI usage across business functions while maintaining control and accountability.

CDW is fully authorized to deliver all Microsoft licencing and cloud programs. Our Microsoft team guides customers through complex licencing decisions to ensure compliance, reduce cost and provide strategic reviews.

WHY THIS MATTERS TO YOUR ORGANIZATION

Many organizations are stuck between AI pilots and production. E7 is designed to close that gap by:

- Enabling secure, governed AI at enterprise scale
- Reducing tool sprawl by consolidating productivity, AI, security and governance
- Empowering employees with AI that works in the flow of their day – not in disconnected tools

Microsoft 365 E7 and Agent 365 are generally available starting May 1, 2026.

HOW CDW HELPS YOU GET AI READY

Technology alone isn't enough. Successful AI adoption requires readiness across people, data, security and operations.

CDW helps organizations:

- Assess AI readiness across identity, data and security foundations
- Design secure AI and Copilot adoption roadmaps aligned to business outcomes
- Prepare environments for agent governance, compliance and data protection
- Support deployment, adoption and ongoing optimization with Microsoft specialists

Whether you're exploring Copilot, planning for E7 or looking to operationalize AI responsibly, CDW can help you move forward with confidence.

READY TO TAKE THE NEXT STEP?

Contact your CDW account manager to connect with a Microsoft specialist and learn how the Frontier Suite and Microsoft 365 E7 can support your AI strategy.
