

CDW Canada Expands Cisco Managed XDR Offerings

CDW Canada is Cisco's first partner in Canada to offer managed Cisco XDR services, expanding MDR capabilities

Toronto, ON, Canada, May 1, 2025 – [CDW Canada](#), a leading provider of technology solutions and services for Canadian organizations, is excited to announce it is expanding its security offerings by harnessing the capabilities of Cisco's Extended Detection and Response (XDR) platform for managed security services.

Cisco XDR is a cloud-based solution designed to simplify security operations and empower security teams to detect, prioritize and respond to the most sophisticated threats. Integrated with the broader Cisco security portfolio and curated third-party offerings, Cisco XDR is one of the most comprehensive and flexible solutions on the market today. Cisco XDR uses AI to enhance its security operations by integrating AI-driven analytics to optimize threat detection and response.

CDW Canada's customers can now harness the benefits of a Managed Detection and Response (MDR) service, leveraging Cisco XDR.

"We are excited to expand our MDR offerings with Cisco Managed XDR services as our next step to expanding our proactive security services," said Ginette Adragna, Vice President and General Manager, CDW Canada. "The platform will allow us to deliver enhanced threat detection and incident response along with 'round the clock cybersecurity monitoring for our customers."

CDW Canada's managed detection and response services, powered by Cisco XDR, offer a comprehensive and unified solution for threat detection, investigation, mitigation, and hunting. This powerful tool helps customers streamline complexity, integrating their security operations and portfolio into a seamless platform. The result is enhanced detection and response capabilities that equips security teams with advanced tools for threat prioritization using AI and

machine learning, providing heightened visibility and automated responses guided by evidence-based recommendations. Supported by 24/7 service, consulting, and implementation expertise, this offering strengthens customers' defenses against the ever-evolving cybersecurity landscape, allowing them to focus on their core business objectives with confidence and peace of mind.

"In the age of AI, it's never been more important for Canadian organizations to have a strong cybersecurity posture," said Raj Juneja, President of Cisco Canada. "With Cisco XDR built into CDW's managed threat and response service, we can give our mutual customers the ability to adopt game-changing technology quickly and effectively, helping them keep pace with an ever-changing threat landscape."
