CDW Canada Awarded Canadian Partner Excellence Award by Dell Technologies for the Fifth Consecutive Year

The award highlights CDW Canada's success in delivering innovative technology solutions that help customers solve complex challenges, drive growth and achieve strategic business outcomes

Etobicoke, ON, Canada – October 15, 2026

CDW Canada, a leading provider of end-to-end technology solutions and services for Canadian organizations, announced today that it has been recognized for the fifth consecutive year with the 2026 Canadian Partner of Excellence Award by Dell Technologies at the Toronto Technology Forum. The award recognizes CDW Canada's success helping customers cut through complexity and turn technology investments into business outcomes.

“Our customers look to CDW to bring together the right technology, expertise and services to help them achieve meaningful outcomes aligned to their goals and challenges,” said Ginette Adragna, Senior Vice President and General Manager, CDW Canada. “Receiving this award for a fifth consecutive year reflects the strength of our relationship with Dell Technologies and the expertise our team brings to customers. Together, we help Canadian organizations navigate complexity, modernize with confidence and build a technology foundation that supports their ambitions.”

The award highlights CDW Canada’s extensive portfolio of Dell Technologies competencies in Core Client, Networking, Server, Storage, Data Protection and Hyperconverged Infrastructure, underscoring its ability to deliver end-to-end solutions that support customers' evolving business and technology needs.

CDW Canada helps customers across the full technology lifecycle, from strategy and design through implementation, management and optimization. CDW Canada maintains Dell Technologies certifications in PowerEdge and MX Modular servers, PowerSwitch networking, PowerStore, PowerScale and PowerFlex storage, as well as PowerProtect data protection solutions. This expertise can be leveraged to help customers make informed technology decisions across their environments that align to their business goals.

For Canadian organizations, that breadth aligns with three priorities: strengthening cybersecurity defences, modernizing hybrid infrastructure and empowering workforce productivity. CDW Canada helps customers connect these priorities to technology choices, from cyber-resilient data protection and flexible infrastructure to the devices and tools employees need to work effectively.

As organizations evaluate artificial intelligence (AI), CDW Canada helps customers move from exploration to execution through expertise spanning strategy, governance, security, infrastructure and managed operations. Its Dell Technologies portfolio includes GPU-equipped PowerEdge infrastructure and PowerScale AI storage. Together, these capabilities help customers plan AI-ready environments and move from pilots toward production with a focus on secure, governed deployments and measurable business outcomes.
