

## **CDW Canada Receives NIST Cybersecurity Framework and ISO/IEC 27001:2013 Certifications**

**Toronto, ON – March 23, 2020**

CDW Canada today announced that it has successfully secured certifications for compliance with ISO/IEC 27701:2013 and NIST Cybersecurity Framework (NIST CSF).

“Safety and security are top priorities at CDW Canada, and we are very proud to have once again achieved both the ISO/IEC 27001:2013 and NIST Cybersecurity Framework certifications. Having acquired Scalar Decisions last year, we are thrilled to unite both company’s journeys and stand as a leader in the cybersecurity space in North America.,” said J.D. Hupp, Vice President & General Manager, CDW Canada. “We are doubling down on our expertise in this field. We are dedicated to providing our clients with unmatched expertise, and our compliance with these internationally-recognized standards and codes of practices further demonstrates our commitment to staying ahead of the cybersecurity threat landscape.”

ISO/IEC 27001:2013 is a security management standard specifying best practices and comprehensive security controls, with a focus on requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of an organization.

Published in 2014, the NIST CSF was developed and standardized based on public workshops, Requests for Comment or Information and thousands of direct interactions with global stakeholders from across all sectors. The NIST CSF consists of standards, guidelines and best practices to manage cybersecurity-related risk, utilizing a prioritized, flexible and cost-effective approach to promote the protection and resilience of critical infrastructure and other sectors of importance to the economy and national security.

“Achieving these important certifications allows CDW Canada to stay at the forefront of industry best practices and should be a cornerstone for forward-thinking organizations. The compliance bar is always rising, and by officially

implementing these standards internally, we are better positioned to adapt to the cybersecurity threat landscape,” added Hupp.

The full scope of services offered by CDW Canada and ISO/IEC 27001:2013 certified can be found [here](#), while the services covered under the NIST CSF certification can be found [here](#).

### **About CDW Canada**

CDW Canada is a leading provider of technology solutions for business, government, education and healthcare. CDW Canada helps customers achieve their goals by delivering integrated technology solutions and services that help customers navigate an increasingly complex IT market and maximize the return on their technology investment.

Areas of focus include software, networking, unified communications, data centre and mobility solutions. CDW Canada is on the Channel Daily News Top 100 Solutions Provider list in Canada, and is a wholly owned subsidiary of Vernon Hills, Illinois-based CDW Corporation, a Fortune 500 company.
