

SECURITY PROGRAM IMPLEMENTATION

Does your organization understand how to monitor and protect its most valuable assets? How does your organization's leadership evaluate the effectiveness of your cybersecurity program? How do you identify objectives and key performance indicators for security-related initiatives as well as day-to-day operations? How do you establish priorities for resource assignment and investment? An effective cybersecurity strategy requires a comprehensive, measurable security program.

Organizations that have integrated their enterprise risk and cybersecurity risk management programs experience significantly lower rates of attack success. Aligning your organization's security program to a recognized, measurable standard such as ISO 27001, SSAE18 SOC2 or the NIST Cybersecurity Framework enables a security strategy focused on business-risk drivers and pinpoints the initiatives to apply your resources and investments toward to most effectively improve your security posture.

FEATURES:

- Tailored security controls that support business outcomes
- Defined roadmap to meet your organization's security maturity objectives
- Proven experience preparing organizations for third-party certification

BENEFITS:

- Designing and implementing a cybersecurity program that prioritizes business-risk drivers ensures that your security initiatives align with and strengthen business outcomes.
- Selecting and documenting security controls that support business processes improves their adoption and minimizes friction.
- Aligning your organization's cybersecurity program with a recognized standard provides your customers, partners and investors with the confidence that your organization takes security seriously, and promotes a culture of continuous improvement.

OUR APPROACH:

PREPARE	DEFEND	RESPOND
Our security consultants work with you to understand your risks, source top security talent and build an effective security program.	Our certified engineers can assist you with implementing robust defenses, integrating leading technologies and maximizing visibility, understanding and control.	Our managed services team can help monitor critical business assets, respond rapidly to incidents and validate effectiveness of security controls.

WHY CDW?

Depth of expertise – We have extensive consulting experience. No matter the size or industry of your organization, we are experienced in solving difficult problems. We've been consulting for Canadian organizations for over 10 years.

Continuous improvement – We invest in our people. Training is integral to ensuring our consultants are up-to-date on the latest security trends, technologies and remediation options. Our consultants regularly attend industry-leading conferences and training sessions to maintain their level of expertise.

Track record – CDW helps many organizations assess, plan, implement and sustain viable information security and risk management programs to address SSAE18 audits, PCI DSS, NIST/FISMA and ISO 27001/ISO27017/ISO27018. CDW has a 100 percent success rate assisting clients with SSAE18 audit preparation, as well as ISO 27001/ISO 27017/ISO 27018 and PCI DSS certification.

Full-service consultancy – CDW has the capability to assess and review IT general controls that require implementation with various degrees of involvement, freeing personnel to work on key business deliverables while alleviating the burden of dealing with stressful audits, complex legislative and regulatory requirements.

Verified – Our team has the experience and the credentials. Our consultants hold a combination of: CISSP, CISM, CISA, CRISC, ISO 27001 LA/IA, ITIL and CCISO.
