

PRIVACY IMPACT ASSESSMENT

Risk Advisory Services

CDW Privacy Impact Assessments (PIA) are used to assist clients to develop a stronger and more robust privacy culture. The PIA identifies privacy risks and gaps that may exist between an organization's Information Management practices and privacy requirements. The assessments identify, assess and prioritize any deficiencies in current privacy practices against the client's privacy obligations, such as Canada's Personal Information Protection and Electronic Documents Act [PIPEDA], Ontario's Personal Health Information Protection Act [PHIPA], Canada's Freedom of Information and Protection of Privacy Act [FIPPA], the EU's General Data Protection Regulation [GDPR], CSA Model Code for the Protection of Personal Information, ISO 27018 for Cloud and others, to determine compliance with required and addressable regulatory requirements.

CDW works closely with your team(s) to conduct the assessment activities, including: reviewing Personal Information (PI) clusters, conducting interviews and workshops and performing a detailed analysis of personal information collected, used, disclosed, stored and retained by the organization.

DELIVERABLES

Comprehensive report and artifacts, including:

- Clear report of global privacy risk
- Assessment methodology
- Maturity state assessment
- Personal information data flow diagram(s)
- Gap analysis report
- Safeguard & controls assessment matrix
- Privacy gap analysis matrix
- Findings & remediation recommendations (including a strategic and tactical roadmap)

BENEFITS

- A PIA serves to improve your information privacy protection posture through long- and short-term measures by providing a foundation on which to build strategic and tactical IT privacy plans, policies, procedures and guidelines
- Provides a catalogue and recommendations on privacy risks and threats, and controls are produced for a client's IT management practices
- Creates continuity between disparate information privacy protection models, processes, procedures and people policies that may be created by corporate mergers, new strategic partnerships and streamlining initiatives
- Determines the compliance of current practices with applicable data protection laws and regulations

CDW RISK ADVISORY SERVICES

We help our clients by improving the performance of their assets in the following centres of excellence: audit and assurance, information security, IT service management and technology advisory. This framework aids in servicing the needs of diverse business sectors. Our talented and driven professionals are committed to helping organizations assess, remediate, monitor and manage operational, security, privacy and technology-related risks. This results in clients achieving their optimal potential and high performance.

IMPACT

With our extensive industry expertise and innovative application of leading-edge solutions, we are our client's preferred provider for superior client services. Our clients appreciate our constant strive for excellence in everything we do by remaining open to new ideas, finding better ways of working and not refraining from taking risks. This composition of skills is precisely why our clients prefer our services in successfully managing risks and effectively transforming those risks into rewards.
