

# MANAGED SIEM AS A SERVICE

Security

## MANAGED SECURITY INFORMATION AND EVENT MANAGEMENT AS A SERVICE

Managed SIEM as a Service provides organizations with an enterprise-wide view of security across their environment. Our solution correlates security log data from all devices within your organization, providing a single pane of glass view into your security ecosystem. This service focuses on identifying security threats to your organization and managing your risk.

### FEATURES

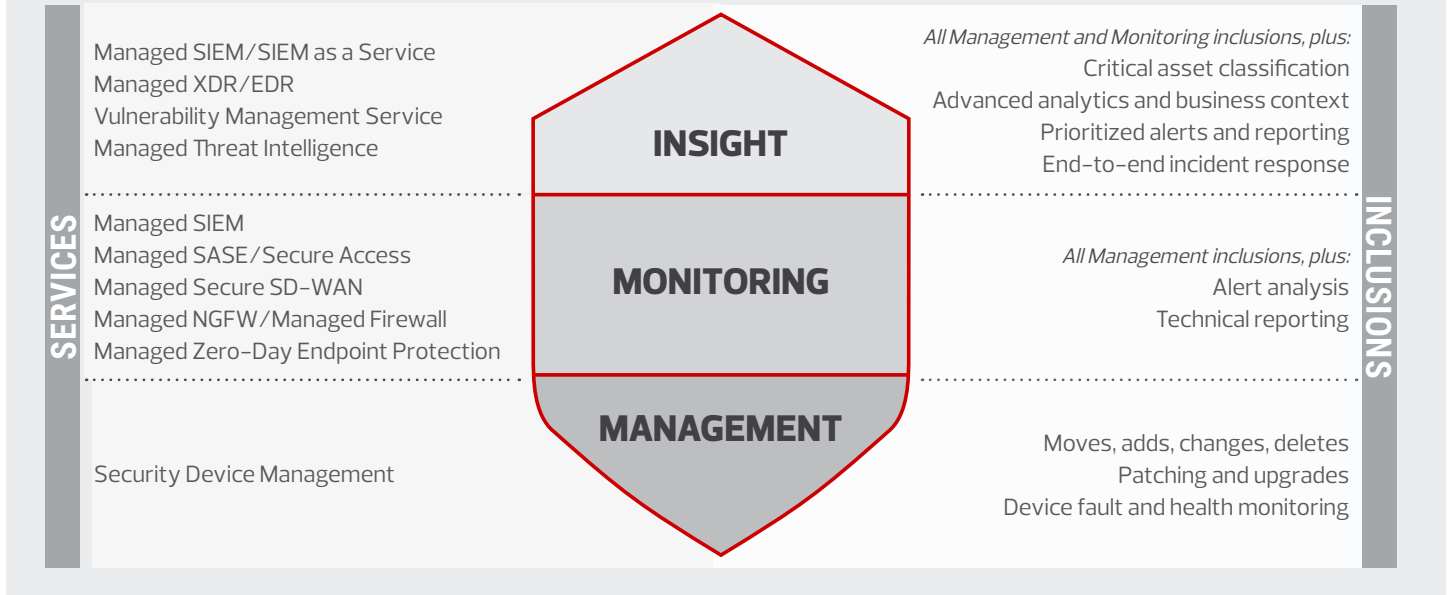

- Identify threats and indicators of compromise from a wide array of sources as well as data specific to the organization
- Centralize all security data in a scalable way allowing CDW analysis to triage with automatically enriched, high-confidence alerts
- Enables data isolation, governance and security while providing the scalability, flexibility and cost optimization advantages of a cloud-based Platform as a service (PaaS)
- Cloud-native architecture with always hot data and full support for on-prem and cloud data sources with the ingestion of any text-based log format
- Linear scalability with ability to ingest in-excess of 100 TB/day
- Service based on daily ingestion volume
- Data-rich reporting and alerting

### BENEFITS

- 24x7x365 service from highly skilled and experienced staff in our Canadian-based Advanced Security Operations Centre
- Enables a holistic view of security across your enterprise IT architecture, giving our security analysts the visibility and control required to quickly and effectively identify security threats to your organization
- Leveraging our highly skilled and specialized security analysts allows you to reduce the impact of costly security staff recruitment and training and to refocus your internal staff on more strategic core business functions
- Our all-inclusive and fully-bundled pricing eliminates the need for upfront capital investment and enables much faster ROI
- Manage risk through ongoing security false positive tuning and consultation
- Continuous improvement through the development and integration of additional security use cases that enhance security detection as your environment changes
- Access to CDW's incident response, penetration testing, professional services and many more

## CDW MANAGED SECURITY SERVICES PORTFOLIO

Our portfolio of services is split into three tiers: Management, for straightforward device management and maintenance; Monitoring, for security alert monitoring and notification; and Insight, our top tier of services, for customers who require more advanced security analytics, response and incident management with business insight. Managed SIEM is part of our Monitoring tier.
