

How weBoost cell signal boosters work:

- 1 OUTSIDE ANTENNA**
Cell signal is received from the tower and transmitted to the booster.
- 2 BOOSTER**
The cell signal is boosted by the booster and sent to the inside antenna.
- 3 INSIDE ANTENNA**
The inside antenna broadcasts the improved cell signal throughout your workspace.

We're raising the bar on cell signal coverage.

weBoost is the leading manufacturer of commercial-grade cell signal boosters for small business. From the office to the road to the warehouse, our boosters are designed to provide your business with the most powerful cell signal possible.

weBoost cell signal boosters share these great features:

- Stops dropped calls and missed messages while improving streaming
- Supports all cell phones and devices on all Canadian carriers
- Simultaneously boosts signal for multiple users
