

CDW Offensive Security Services

Risk Advisory

SERVICE OVERVIEW

Penetration testing isn't a checkbox; it's how you uncover real world weaknesses across networks, systems, web and mobile applications and other critical assets before adversaries exploit them.

Get professional grade assessments tailored to your environment and scale. Our ethical hackers simulate real attacks, expose the issues that matter and deliver clear remediation guidance all backed by an intuitive customer portal with detailed reporting that keeps your team informed end to end.

Choose the approach that fits your needs: cost effective automated testing, in depth adversarial simulations, or continuous penetration testing through Penetration Testing-as-a-Service (PTaaS), so your organization stays ahead of evolving threats.

COVERAGE FOR YOUR WHOLE ATTACK SURFACE

SERVICE FEATURES

Comprehensive Testing

Identify and remediate vulnerabilities across your networks, systems and applications with CDW's comprehensive penetration testing, uncovering vulnerabilities from every angle.

Real-World Simulation

Ethical hackers using the same tools and techniques as attackers do to test your defences.

Vulnerability Management Portal

Access to a secure online portal to view, prioritize and track vulnerabilities in real time.

Actionable Reporting

Receive a detailed, simple-language formal report with risk ratings, proof of findings and clear remediation steps.

Expert Guidance

Optional debrief session with our security consultants to review results and plan next steps.

WHY CDW?

- Dedicated, in-house, Canadian penetration testing professionals
- Extensive designations, security clearances and industry certifications such as OSCP, CISSP, GPEN and CEH.
- Several published CVEs, and experience aiding organizations of all sizes across a multitude of industry verticals
- Our approach integrates OWASP, PTES, and NIST SP 800-115 standards, ensuring top-tier security

LEVEL UP YOUR SECURITY POSTURE

Let us be your partner in maturing your security posture. No matter where you are on your security journey, CDW has a penetration testing offering that can be tailored to your unique business needs.

Core Penetration Test Service (Automated)

We offer an affordable, effective way for your organization to assess internal and external security. Our automated tools and expert review quickly identify common vulnerabilities, giving you a clear, actionable snapshot of your risks and practical steps to improve, all without straining your budget.

Traditional Penetration Testing & Adversarial Simulations

If you need deeper assurance, our experts manually test your networks, cloud and applications to uncover hidden weaknesses. For organizations seeking to validate their defences, we conduct realistic attack simulations (“red team” and “purple team” exercises) to test your detection, response and overall security effectiveness.

Vulnerability Management & Penetration Testing-as-a-Service (PTaaS)

Stay ahead of threats with continuous risk visibility. Our PTaaS platform delivers ongoing vulnerability discovery, prioritization and recurring penetration testing aimed at helping your team maintain consistent awareness, accelerate remediation and adapt to evolving environments.

SERVICE LEVELS

Features	Core Penetration Test	Time-Boxed Network Penetration Test	Traditional Network Penetration Test
Full Vulnerability Assessment	Yes	No	Yes
Automated Tools for Testing	Yes	Yes	Yes
Manual Penetration Testing	Basic	Comprehensive ¹	Comprehensive
Customer Portal Access	Included	Included	Included
Report	Basic	Comprehensive	Comprehensive
Segmentation Testing	Yes ²	Yes ²	Yes ²
Cloud Penetration Testing	No	Yes ²	Yes ²
OT/SCADA Testing	No	Yes ²	Yes ²

¹ Use of automated tools and level of testing dependent on time allocated
² Can be included as an add-on to the existing service.
