

Core Penetration Test Service Offering

Risk Advisory

SERVICE OVERVIEW

Protect your business before attackers find the gaps. Get professional-level security assessments without the enterprise level costs. CDW empowers organizations of any size to uncover and close security gaps across your entire network, inside and out. Our ethical hackers simulate real-world attacks to expose weaknesses, deliver clear remediation guidance and help you strengthen your overall security posture all through an intuitive customer portal with detailed reporting that keeps you informed every step of the way.

BENEFITS

- Combines the power of automation with manual validation
- Covers both internal and external network
- Identifies exploitable vulnerabilities before attackers do
- Validates security controls and measures effectiveness
- Protects sensitive data from unauthorized access
- Meets compliance requirements (e.g., PCI DSS, SOC 2, ISO 27001)
- Improves incident response readiness

THE CDW ADVANTAGE

- 18+ years as a practice
- 100% Canadian delivery
- Service tiers to meet your needs
- 50+ professional certifications (including OSCE, OSCP, OSWP, CEH, CISSP, GPEN)
- Industry-backed standards and frameworks (OWASP, PTES, NIST SP 800-115, MITRE ATT&CK)

FEATURES

Clear remediation instructions for every finding

Detection and response recommendations for relevant findings

A comparison to the previous year's results, when applicable

Customer portal to track vulnerability findings and remediation efforts

Clear documentation of testing actions taken, validated exploit paths, business impact and prioritized remediation suitable for both technical teams and executive stakeholders

Debrief session with security consultants

WHY IT MATTERS

Organizations that experience a cybersecurity incident report a significant impact. CDW Canada's Cybersecurity study revealed that:

95%

of the organizations that were surveyed experienced attacks

14

days is the average downtime

5

days is the average time to detect a cyberattack
