

CDW FOR EMERGING TECHNOLOGY

DRONES: PILOTLESS REVOLUTION TAKES FLIGHT

Precise. Flexible. Completely accessible. Drone technology is rewriting the rules on the way people understand, analyze and discover the world around them.

DRONE TECHNOLOGY: ELEVATING YOUR PERSPECTIVE

Empower individual creativity, satisfy curiosity and reach new heights using a drone's ever-changing functionalities. This emerging technology can help you:

- Capture striking footage and detailed images
- Improve security and public safety
- Reach remote or dangerous areas with little manpower
- Inspect or assess infrastructure, work sites
- Aid in search, rescue and recovery efforts
- Use as a learning tool in STEM curriculum
- Monitor crops with accuracy and precision
- Map and survey land more efficiently with aerial data

CHANGING NEEDS, CHANGING KNOWLEDGE

As technology changes, so must the knowledge that guides its selection, use, rules and requirements. Which infrastructure updates do the new capabilities require? How can personnel connect and collaborate more effectively? What training will team members require? Who will handle ongoing management?

CDW KNOWS DRONES

CDW is your all-in-one resource, an extension of your IT team, with a deep bench of experts and proficiency in the latest solutions. This field-proven experience focuses on you, from assessment to deployment, to put you ahead of technology's challenges on day one.

STRONG PARTNERS, STRONGER RESULTS

Count on CDW solutions drawn from the strongest vendor offerings in the industry – the right choices for your needs and goals.
