

# Why Service Express?

With the demands to keep data center operations performance high and costs low, you need more effective options.

## We offer flexible solutions to fit your needs and reduce costs.

As an alternative to traditional OEM maintenance options, we help you with smart, reliable hardware support and value.

### Multi-Platform Maintenance

- Server Support
- Storage Support
- System Support
- Network Support

### Additional Services

- Data Center Relocations
- OS Support
- Virtualization Support
- Time & Material Services

## A Comprehensive Approach to Service

It starts with understanding your needs first - identifying how you can get the best results for your environment. Support includes strong technical expertise, outstanding customer service, flexible coverage and cost-effective solutions.

### IT Priorities

Support is customized to what's most important to you, including flexible coverage, user-friendly service and reduced cost.

### Technical Problem-Solving

From complex to break/fix issues, we are experienced in meeting data center needs and restoring operations.

### Exceptional Service

How can we help? We respond without hesitation and make it easy for you to count on us.

## Multivendor support for your data center

Streamline your support. We provide maintenance for Cisco, Dell, IBM and more. You can choose flexible, cost-effective options for post-warranty, EOL & EOSL equipment, and uplift service to cover the mix in your data center.
