

Built for learning

With Chromebooks, educators can deepen classroom connections and foster more meaningful learning experiences.

Easily deploy and manage to maximize efficiency.

Quickly set up and manage any number of devices. Centrally administer settings and controls for your school network – adding users, devices, printers, and internet access – all from an intuitive web interface.

Deliver value with flexible design.

Get more use from your devices by sharing them across multiple classrooms and students. Choose from a range of Chromebook options to accommodate differing student ages and learning abilities.

Simplify with built-in security.

Keep your devices protected from the latest viruses and threats with pre-installed anti-malware, multilayered security, and automatic updates that can help extend the lifespan of your Chromebooks.

Make a difference in and out of the classroom.

Help prepare students for the future with collaborative projects that deepen their digital skills. Improve productivity by providing students access to their own apps, settings, and bookmarks from any device.

Open a world of opportunities.

With Chromebooks, schools around the world are investing in their students' futures through next-generation learning technology that fits easily within their budgets.

Built with educators – for educators.

Inspired by feedback from educators around the world, Chromebook keeps evolving to better serve your needs.

- Enable personal accessibility settings across devices
- Work effectively both online and off with instant boot-up
- Keep productive with an extended all-day battery life
- Securely administer quizzes using locked mode
