

SOLUTION BRIEF

Better together: Adobe Acrobat Pro and Microsoft 365

Reinvent your workflows with seamless integrations.

If the new hybrid world could be framed in one word, it would be disjointed. Disconnected tools. Multiple applications. Siloed workflows. Not to mention constant context shifting that slows down work and speeds up employee burnout. But even though how we work has changed, the nature of what we do hasn't. Contracts still need to be signed. Employees still need to be onboarded. Collaboration is just as important—if not more important—than ever.

To stay ahead, organizations need a new set of document tools that deliver better employee and customer experiences. By integrating Adobe Acrobat Pro with the Microsoft 365 applications people use every day, we're creating faster, simpler ways for organizations to collaborate, transact, and work from anywhere.

Benefits

Working with Acrobat Pro and Microsoft 365 together.

Together, Adobe and Microsoft are helping build the future of work. Acrobat Pro is the complete all-in-one PDF and e-signature solution that integrates intuitively with Microsoft 365 applications like Word, Outlook, SharePoint, and Teams. The result: more efficiency, better employee experiences, and improved security.

Increase your efficiency.

Give employees an easier way to get more done with automated and streamlined digital workflows that eliminate paper, printing, and mailing.

Automate your workflows.

Acrobat and Microsoft 365 integrations save organizations time and money while reducing manual errors by automating routine, manual tasks.

Go digital.

Removing paper-based processes from day-to-day work means faster contract approvals, document access anywhere and anytime, and fewer costs associated with printing, mailing, and faxing. It also provides more sustainability with a solution that's as good for the environment as it is for the business.

Keep business moving forward.

With real-time collaboration tools, employees can work together more efficiently, keep track of key documents, and make sure projects stay on task.

Improve the employee experience.

Do more with fewer steps. Acrobat Pro and Microsoft 365 work together, so teams experience less friction and more speed.

Collaborate anywhere, anytime.
