Small and medium data center solutions

Transform your data center with innovative, secure and smart infrastructure

Imagine creating the ideal data center — from rack to row, room to building. Schneider Electric solutions can help transform your data center with reliable APC products and expert services developed to help you maintain uptime when every minute counts.

Experience operational excellence with data center innovation

With APC and Schneider Electric, you get physical infrastructure solutions that scale with your business without compromising security or performance?

- Keep up with cloud-based business and big data
- Deliver reliable, efficient and scalable infrastructure while ensuring data center security
- Monitor and control your entire physical infrastructure
- Automate and integrate data center management
- Simplify and speed up planning, designing and building your data center

Leading provider of physical infrastructure solutions

APC data center solutions protect and optimize data centers and networks in many industries worldwide. APC physical infrastructure products include racks, power, power distribution, cooling and containment — plus, modular designs ready to plug and play into your environment.

Adaptable solutions fine-tuned to your needs

When data center infrastructure management Software (DCIM) software is installed and your data center is operational, you can collect and analyze data and control power and processes system-wide or on individual devices. EcoStruxure™ IT is Schneider's suite of DCIM solutions to help you plan, monitor and manage your data center.

Use as much or as little support as you need with Data Center Lifecycle Services. A complete portfolio of services to assess, plan, design, build and operate your data center, ensuring security and efficiency throughout all lifecycle phases.

Service plans: EcoCare for Modular Data Centers

Looking for a single, comprehensive service plan for all the technologies of your modular data center, including low voltage switchgear, UPS and cooling, across its entire lifecycle? EcoCare for Modular Data Centers helps you boost uptime, while reducing operational costs and empowering your team. Become an EcoCare member and obtain exclusive support and innovative digital services.
