

Trust Smart-UPS to power continuous business operations

Schneider Electric products have disrupted the market with smaller, lighter UPS systems with more power and improved battery life—and lithium-ion batteries that require no replacements.

Key benefits:

Longer lifespan: Lithium-ion batteries can last up to 10 years, compared to three to five years for VRLA

5-year warranty: Complete peace of mind for your UPS and battery

Remote Management: Cloud-based monitoring and management with ECOstruxure SmartConnect gives you secure visibility into your UPS from any device, anywhere, anytime

Lower total cost of ownership: Longer battery life, fewer replacements, and reduced maintenance significantly cut costs compared to VRLA-based solutions.

Standard Lithium-ion models

Smart-UPS Lithium-ion

Trusted line interactive protection with 3x the battery life, from 500VA to 3000VA with short-depth options available.

Ultra Lithium-ion models

Smart-UPS Ultra

Ultra-high density on-line power protection in a small, light size (just 1U) for up to 3000VA. Designed for local edge environments and micro data centers.

Smart-UPS Modular Ultra

A modular UPS in a small, light form factor that scales up to 20kW of single-phase power protection. Starting at 5kW, add power or battery modules to grow with your IT demands.

Contact your account manager for a complimentary power assessment.
