

CDW Performance Comparison: M1 MacBook vs. Core i7 Windows Laptop

CDW tested the performance of the new Apple M1 MacBook Air against one of our largest selling Windows laptop CPUs: Intel Core i7 vPro.

We tested them with common office productivity tasks, and the results were striking. In our side-by-side videos, you can see how the M1 stacks up in the following areas:

- Microsoft Word
- Microsoft Excel
- Microsoft Powerpoint
- Power Consumption
- Addressing "Charge Anxiety"
