DATASHEET

Aurora® Managed Detection and Response (MDR)

Eliminate threats across all attack surfaces with prevention, detection, and response.

Proactive MDR for AI-Driven Security Operations

Security teams are overwhelmed by alert volume, emerging AI-driven threats, and rising expectations to do more with fewer resources. Teams are forced to react to threats instead of stopping them. Complicating matters, there is increasing pressure to adopt AI in security operations without the expertise or best practices for guidance.

Shift from reactive to strategic with Arctic Wolf as your Security Operations Partner. With proactive Managed Detection and Response (MDR) and an Agentic SOC built-in for faster security outcomes, organizations receive more than detection and response. We combine the world's largest commercial SOC, an expert Concierge Experience, and a Superintelligence platform that works with your current security investments. With preventative hardening, ongoing guidance, and measurable security improvements, we reduce the frequency and severity of security incidents.

According to KPMG's Security Operations Center Survey[1], 85% of CISOs with a SOC report confidence in their ability to deter sophisticated attacks. CISOs without a SOC don't have the same strong readiness confidence. The importance of a holistic approach to Security Operations is why our preemptive MDR isn't limited to triage, investigation, and response through tickets. Arctic Wolf delivers an Agentic SOC with world-class expertise and regular security posture reviews.

330 trillion
OBSERVATIONS

AVERAGE
1 alert
PER DAY

Arctic Wolf MDR reduces noise. Our SOC works across 330 trillion observations weekly to only send actionable alerts, reducing noise by over 99% for customers, which means on average customers receive only 1 alert a day.[2]

Key Benefits

Strengthen Security Posture Continuously Through Proactive MDR

- Concierge Experience with dedicated security experts
- Security Posture in-Depth Reviews (SPiDRs) and ongoing recommendations
- Security Journey® to track and demonstrate measurable improvement over time

Disrupt Attacks and Reduce Impact with AI Led MDR by 90%

- Aurora Superintelligence Platform is built on an open XDR Architecture
- AI-led analysis with humans in the loop, grounded in real-world validation
- Active Response for rapid containment within your environment
- 24x7 Security Teams delivered by the world's largest commercial SOC

Accelerate Security Operations Speed with Context and Visibility

- Threat Intelligence informed by real-world security operations
- Data Explorer for direct access to parsed, enriched security data to monitor trends
- Broad Integrations and unlimited ingestion across attack surfaces

MDR at Machine Speed

Aurora Wolf Managed Detection and Response delivers security operations by combining open data ingestion, AI-driven analysis, and expert-led guidance across your environment to reduce the severity and frequency of cyber attacks. Built on the Aurora Superintelligence Platform, Arctic Wolf serves as a true Security Operations Partner. Move at machine speed, without having to architect an Agentic SOC and staff it yourself.

Unlimited Ingestion of Your Existing Security Investments

Choose the tools that work best for your organization without being locked into a single vendor ecosystem. Arctic Wolf ingests security data across cloud, endpoint, identity, network, and applications without changing the tools you rely on.

Built in Agentic SOC

Machine-speed analysis identifies high-fidelity threats at scale with the backing of over a decade of security operations expertise. Powered by the Swarm of Experts™, Security Operations Graph™, and AI Trust Engine™, the Aurora Superintelligence Platform combines AI speed and scale with human judgment to outperform AI-only and human-only approaches.

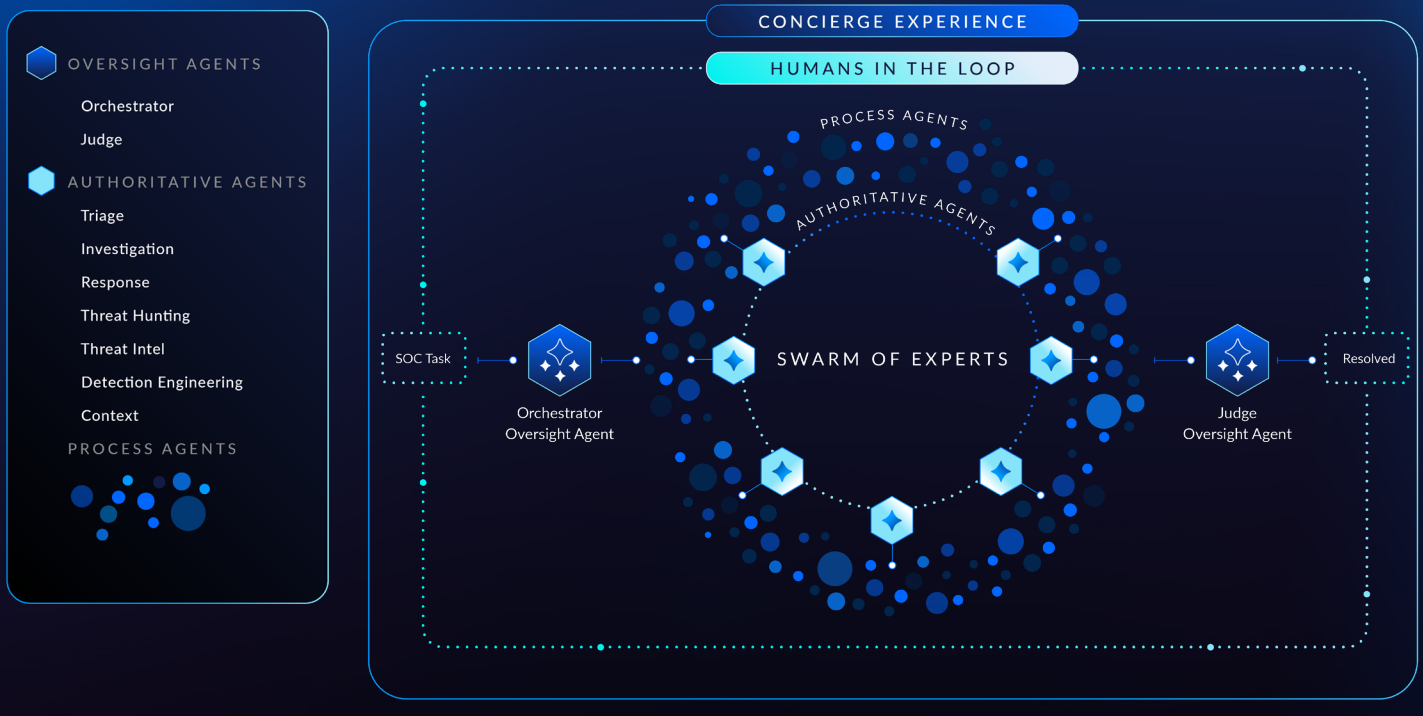

Security Expertise Customized for Your Organization

Every customer receives the Arctic Wolf Concierge Experience, with regular engagement from security experts who understand your environment, priorities, and risks. This tailored guidance helps organizations move beyond reacting to alerts to making measurable improvements.

Real Risk Reduction

Arctic Wolf's MDR combines 24x7 detection and response with the Concierge Experience and Active Response capabilities for faster investigation, response, and proactive hardening. Arctic Wolf stands behind its approach with an industry-leading Security Operations Warranty of up to $3 million.

World-Class Security Operations, Within Reach for Every Team

Organizations benefit from proactive MDR that reduces the frequency and severity of attacks, backed by 24×7 coverage from the world’s largest commercial SOC and rapid response actions taken directly in your environment. Beyond day-to-day operations, Arctic Wolf provides tailored guidance through its Concierge Experience, helping organizations harden security posture, close gaps, and track progress over time through a measurable Security Journey®.

Arctic Wolf backs our solutions with risk transfer through an industry-leading Security Operations Warranty of up to $3 million (USD), delivering trusted outcomes, accountability, and business resilience. With Arctic Wolf, you don’t buy a tool with services attached. You gain a partner committed to reducing risk and improving security outcomes.

About Arctic Wolf

Arctic Wolf is the cybersecurity and AI company that ends cyber risk by transforming it into business resilience. Powered by the Aurora® Superintelligence Platform, Arctic Wolf delivers modern security operations built on proprietary AI and decades of real-world expertise. By combining AI-driven automation with expert-validated precision, Arctic Wolf helps organizations confidently manage cyber risk — so organizations can operate with control and the freedom to innovate.
