WE GET HOW
TO BRING CLARITY
TO THE CLOUD.

CDW Amplified™ Hybrid Cloud
VMC on AWS Design and Deployment Services

It can be a challenge for any organization to know how to begin their cloud journey. By working with CDW, we can help you quickly recognize the benefits. VMC (VMware Cloud) on AWS simplifies Hybrid Cloud by providing VMware's Software-Defined Data Center on one of the world's most popular public cloud platforms. It is a fully managed vSphere-based environment running on AWS infrastructure, which provides dynamic, flexible consumption of IaaS resources via familiar vSphere management tools. This model provides the functionality and elasticity clients have come to expect from AWS Cloud.

VMware Cloud on AWS can help you achieve:

Operational Efficiencies

Agility

Faster Innovation

Orchestrating the Right Solution

VMC on AWS Proof of Concept (POC): This engagement allows clients to go through a CDW-provided, at VMware's guidance and participation, workshop. CDW will conduct a VMware Cloud on AWS 30-day POC Workshop with your organization at the specified location. This remote engagement will be conducted jointly by CDW and your team, and features planning, configuration, operations, environment burn-in, AWS services Adjacency Workshop (to explore Native AWS services), and use-case testing. Included in the deliverables with this service are a Technical Overview Presentation and VMC Pre-flight Checklist.

VMC on AWS Design and Implementation Services: These engagements focus on design and implementation of VMware Cloud on AWS. This is a physical VMware infrastructure that is located in AWS data centers and managed by AWS/VMware. It is a true IaaS model, but using the same VMware infrastructure and management tools you already use in your on-premises data center. The VMware Cloud on AWS Design Workshop focuses on implementation design and use-case validation to help prepare for a successful VMware Cloud on AWS deployment. The VMware Cloud on AWS Implementation service focuses on taking the design variables and implementing the SDDC, establishing connectivity and integration with your on-premises data center, and running through pilot operation and migration tasks to ensure a smooth transition to VMware Cloud on AWS.

CDW GETS VMWARE

CDW, VMware and AWS have teamed up to bring our leading capabilities together to deliver a truly compelling and differentiated solution.

Our partnership delivers:

· Leading compute, storage and network virtualization capabilities

· Support for a broad range of workloads

· De facto standard for the enterprise data center

· Flexible consumption economics

· Broadest set of cloud services

· Global scale and reach

We design, orchestrate and manage customized services and solutions for organizations big and small. Let CDW focus on the IT business, so you can grow yours.

CDW's full lifecycle of Services can support your business no matter where you are on your journey

Design → Orchestrate → Manage   On-Premises → On-Journey → Cloud-Based

CDW AMPLIFIED™ SERVICES

Services Overview

The following are included in CDW's portfolio of VMC on AWS Services:

VMware Services	
Service	**Description**
VMC on AWS Proof of Concept Workshop	Get a technical overview of the solution, perform use-case assessments, and receive needed design documentation. Design, configuration and operations overview of VMC.
VMC on AWS Design Workshop	Expert design and assessment assistance to ensure the VMC environment is well-architected.
VMC on AWS Deployment Services	Deployment expertise, knowledge transfer, and adoption around your organization's VMC environment.
VMC on AWS Workload Migration	Expert VMC workload assessment and migration engagement.
VMC on AWS Site Recovery (SRM Integration)	Site recovery assessments and design services to assure environments are deployed to meet uptime and recovery objectives.

Certifications

CDW has earned multiple Master Services Competencies, which are VMware's Partner enablement designations. They are designed to identify the people who can provide the very best support to clients. We have been awarded Master Services Competencies in the following areas:

vmware® Principal Partner — Cloud Provider

vmware® Principal Partner — Cloud Management and Automation

vmware® Principal Partner — Data Center Virtualization

vmware® Principal Partner — Digital Workspace

vmware® Principal Partner — Network and Security

vmware® Principal Partner — VMware Cloud on AWS

vmware®
