

Box AI

Unlock the value of your enterprise content

Artificial intelligence (AI), when combined with your content, opens up endless opportunities for your business. It's no wonder 93%¹ of leaders prioritize AI in content management.

Whether you're talking sales presentations that close deals, financial spreadsheets, PDF specs for products that captivate industries, or anything in between — your unstructured data is a goldmine. And you can harness its potential with the power of Box AI.

Built right into our intelligent and secure content platform, Box AI is your partner for managing, protecting, and getting the most from your valuable assets.

Ensure secure, responsible use of AI

Leverage the latest AI solutions, like secure RAG (retrieval-augmented generation), while maintaining peace of mind with our commitment to protecting your sensitive data.

Build and customize AI agents

With Box AI Studio, you can create Box AI Agents tailored to your business. Get the best in integrations from large language models (LLMs) supplied by our trusted AI model providers.

Limitless insights

Delve into contracts. Extract insights from images. Calculate financials. With unlimited queries, you tap into a wealth of knowledge across Box Notes, documents, and Box Hubs.

Query multiple documents

Did you know that 47% of digital workers struggle to find the data they need to do their jobs? Get answers in seconds across multiple documents curated in a Box Hub with the power of Box AI.

Create content in seconds

Whether you're starting from scratch or fine-tuning your message, Box AI has you covered. Create top-notch content effortlessly, and free up time for innovating.

Streamline content security

Leverage classification labels with access controls and governance policies to ensure generated content gets automatically secured.

Box AI benefits:

Reduce risk of information leaks with secure RAG

Choose the best model for your use cases with trusted AI models in Box AI Studio

Save hours as Box AI for Hubs simplifies complex concepts across curated content

Power productivity (and end app switching) with seamless Box AI access across Box Notes, documents, and Box Hubs

Extend Box AI to your content with pre-built integrations like Box AI for Slack, powering content and conversations

Intelligent Content Management with AI-powered metadata

Metadata provides essential context for AI to understand and process content effectively.

Automatically populate metadata

With Box AI metadata built into where your content lives, you will soon be able to automatically populate metadata fields with pre-built templates.

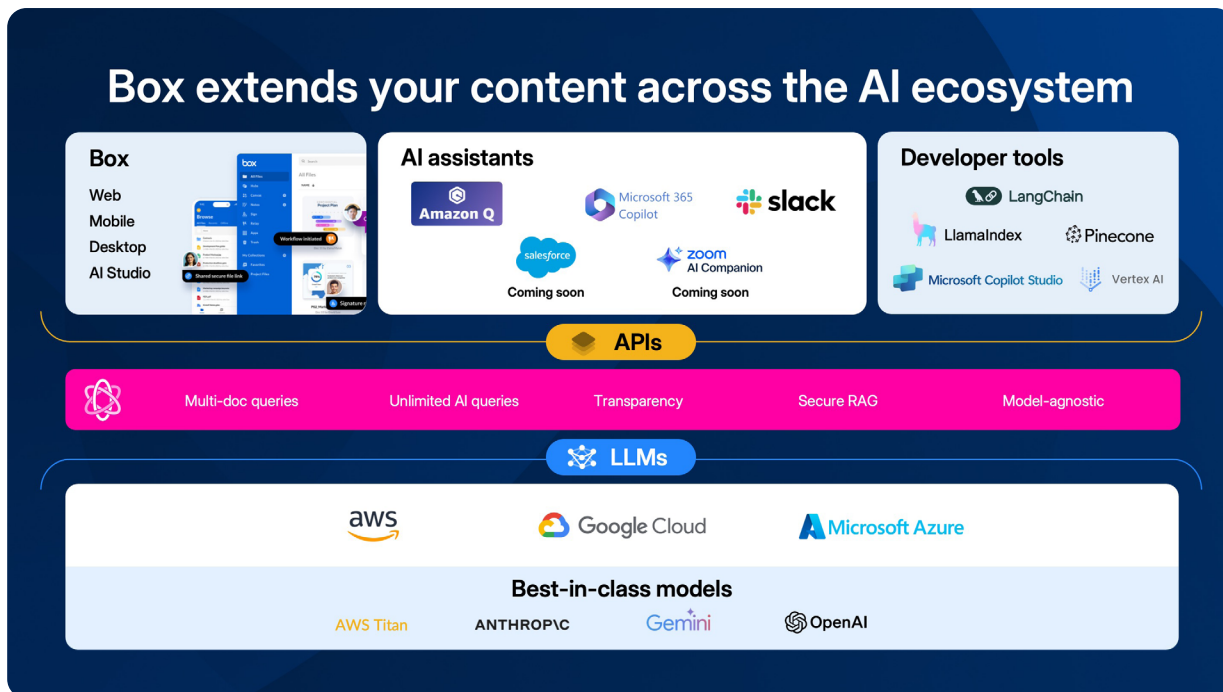

Supercharge workflows

Enhance automated workflows with even greater precision, and reduce errors with the addition of metadata.

Extend Box AI across your entire content ecosystem

Extend Box AI to your favorite apps with Box AI APIs, and build intelligence into your custom apps.

Future-proof your AI strategy with the purpose-built platform for managing, securing, and getting the most from your valuable content.
