box SIGN

Secure, seamless signatures where your content lives

23%

expected e-signature market growth from 2020 to 2025[1]

1 out of 3

of organizations deploy multiple e-signature tools[1]

70%
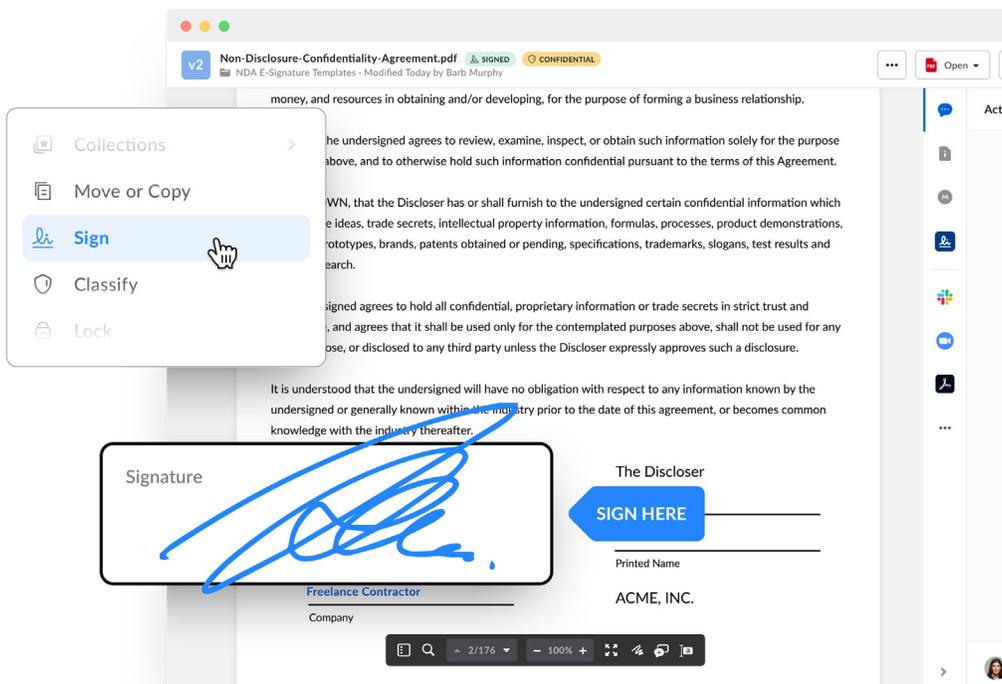

employees don't have access to e-sign tools[2]

As companies settle into a remote and hybrid work model, the demand for e-signatures continues to grow. Organizations deploy standalone e-sign tools, and in some cases, multiple e-sign tools just to solve for what is one step of a larger business process. These point solutions create content silos, disjointed user experiences, and expose businesses to security and compliance risks. And if those repercussions don't break your budget, the price tag will. That's why we created Box Sign.

An entirely new e-sign experience

Our new, secure e-sign solution delivers a seamless and feature-rich e-signature experience that'sunmistakably Box. That means no more content silos, no security gaps, no disconnected userexperiences, and no hidden fees. Even better, every customer on the Box Business plan and above getsunlimited e-signatures from the Box web app. Further, Enterprise Plus customers get unlimited e-signatures via Box Sign third party integrations, all at no added cost.

Benefits of natively integrated e-signatures:

- **Empower your organization** with the speed and convenience of built-in e-signatures

- **Delight every user** from customers and partners to employees, with a seamless experience

- **Reduce business risk** with secure, compliant e-signatures right where your content lives

- **Gain a competitive edge** with modern workflows that eliminate paper-based processes

Box Sign capabilities

Integrated e-signatures

Deliver a rich set of features to address every business need:

- Sign and/or request signatures on 40+ file formats with multiple document package support
- Anyone you request can sign, whether or not they have a Box account
- 12 standard fields to prepare documents and create reusable templates
- Customize signature requests to reflect your brand, including company name, logo, color, and more
- Track progress in real time, and send email reminders and deadline notifications
- Handle complex workflows with serial and parallel document routing
- Automate downstream actions post-signature with Box Relay
- Restrict signature requests on sensitive content with Box Shield
- Upload a spreadsheet of contacts and get documents signed by hundreds of recipients in one go
- Post documents online and share links for signers to access and sign at any time
- Keep documents secure with signer authentication and tamper-proofing controls
- Ensure signatures stay secure and compliant (Box Sign inherits the Box security and compliance profile, including HIPAA, SOC, ISO, FedRAMP, and more)

Off-the-shelf integrations

- **Salesforce:** Generate and send NDAs, contracts, and more for signature directly from Salesforce
- **Appian:** Integrate Appian documents with Box Sign for internal or external e-signatures
- **UiPath:** Accelerate complex enterprise work streams and e-signature processes
- **Crooze:** Automatically generate and send predefined documents for signature within Crooze Contracts Management
- **Versafile's docuflow for SAP:** Automate SAP signing and tasks with better tracking and visibility
- **Certa:** View, edit, and sign right from the Certa workflow automation platform
- **MXHero Mail2Sign:** Initiate Box Sign signatures directly from email
