HEALTHCARE SOLUTIONS FROM BROTHER

Accessible and Dependable Printing, Scanning, and Labeling for Healthcare

Smart Print Management Designed for Healthcare

No matter where your healthcare facility is on the road in digital transformation, paper documents continue to be part of the healthcare workflow. The challenge is integrating paper and digital content, while also streamlining daily operations and prioritizing patient care. Brother offers document management technology and solutions for your healthcare facility that can make a measurable difference in capturing patient information, supporting compliance, and cutting costs.

PROTECT PATIENT INFORMATION

Securing sensitive patient data to meet HIPAA requirements is a top priority for healthcare facilities. Brother printers, all-in-ones, and scanners offer triple layer security features that can help ensure the security of sensitive documents, devices, and networks. Icons can be removed from the User Interface of select devices to eliminate access to a feature, while predefined icons help to reduce the risk of documents accidentally being sent to the wrong destination.

IMPROVE POINT-OF-CARE EFFICIENCY

Help save time, reduce errors, improve patient care, and boost efficiency with our point-of-care devices. Brother will help your healthcare practice securely capture and share patient information, medical records, medication lists, care instructions, and more. Brother supports electronic health record (EHR) interoperability and provides a range of technology to help transform paper forms into highly secure, usable, and retrievable data.

HEALTHCARE CERTIFICATIONS FOR BROTHER PRODUCTS

To address the needs of healthcare facilities, Brother offers devices that are Cerner-validated, as well as MEDITECH tested and supported, and Epic approved. Many Brother products are also equipped with an ISIS compliant driver for scanning from applications like Allscripts®.

Printing, Scanning, and Labeling Solutions For Your Healthcare Facility

BACK OFFICE / NURSING STATION

· Patient records and notes
· Schedules
· Signage
· Billing and claims processing
· Asset tracking labels for hospital equipment

PHARMACY

· Medication labels

EMERGENCY

Brother Can Help Your Healthcare Facility

Provide Reliable Patient Care

Brother offers a number of solutions designed to help improve patient care and provider productivity from hospital to dentist office.

Capture and Share Information

Brother offers solutions-based products and applications that allow you to securely capture documents and send or share critical patient information.

Cut Print and Supply Costs

Right size your print and capture environment to meet your facility's workflow, budget, and facilities requirements. Get a low cost investment and performance you can monitor and trust.

Mobile Printing and Labeling Solutions for Healthcare Facilities

Brother mobile printing and labeling solutions enable medical staff to easily print barcode document labels when needed and accurately identify documents, charts, files, and lab specimens. Virtually all of our labeling products provide the ability to print on laminated labels that easily adhere to a variety of surfaces and can withstand usage in harsh environments.
