# INFINITY EXTERNAL RISK MANAGEMENT FOR VALUE-ADDED RESELLERS

Expand your offering and grow your business with Infinity ERM

## CHALLENGE

To keep up with rapidly evolving markets and meet the demands of customers, VARs must keep a finger on the pulse of the industry and periodically review their portfolio. Providing clients with the best technologies available is the surest way to maintain trust, help customers protect themselves, and drive business growth.

With Infinity External Risk Management (ERM), Check Point partners have the opportunity to increase revenue while offering a leading solution that reduces risk and keeps customers secure. The Infinity ERM solution proactively defends against a wide array of external threats, including the top 3 most common attack vectors: leaked credentials, phishing attacks, and the exploitation of external vulnerabilities.

**93%** | of alerts identify relevant, true positive threats

**55M** | intelligence items collected every month

**96%** | takedown success rate over the past 10 quarters

## KEY BENEFITS

- Provide an essential cybersecurity product that is highly demanded by senior security leaders across industries.

- Ensure you're offering a best-in-class technology that is consistently recognized as a market-leading solution.

- Grow your business by increasing revenue with existing accounts and winning new customers.

- Engage prospective customers by offering a free external risk assessment, which can be provided free of charge.

- Enjoy joint GTM support that includes collateral, training courses, sales support, and co-marketing activities.

# MANAGE EXPOSURE. PRIORITIZE THREATS. REDUCE RISK.

By combining cyber threat intelligence, deep and dark web monitoring, external attack surface management, brand protection capabilities, and supply chain intelligence into a single unified solution, Infinity ERM helps businesses quickly mitigate external cyber risks before they have the chance to develop into damaging security incidents.

| Attack Surface Monitoring | Targeted Threat Intelligence | Global Threat Intelligence | Digital Risk Protection | Supply Chain Intelligence |
|---|---|---|---|---|
| Shadow IT & Asset Discovery | Darkweb Monitoring & Threat Actor Chatter | Ransomware Watch & Threat Landscape | Typosquatting Brand & Phishing Protection | Vendors & Technology Detection |
| Vulnerabilities & Exposure Detection | Credentials & Account Takeover | Enriched IoC Feeds | Social Media Impersonation | 3rd Party Risk Management |
| CVE Intelligence | Fraud & Data Leakage | Intelligence Knowledgebase | Mobile App Impersonation | Alerting On Critical Risks & Breaches |

## ↻ Remediation
**Fast & Effetive Takedowns | 3rd Party Integrations**

## Expert Threat Intelligence
**Triage & Contextualization of Alerts | Virtual HUMINT | Custom Investigations**

# RECOGNITION AS AN INDUSTRY LEADER FROM TRUSTED ANALYSTS

# ABOUT CYBERINT

Cyberint, now a Check Point company, reduces risk by helping organizations detect and mitigate external cyber threats before they have an adverse impact. The Check Point External Risk Management solution provides superior visibility through continuous discovery of the evolving attack surface, combined with the automated collection and analysis of vast quantities of intelligence from across the open, deep and dark web. A team of global military-grade cybersecurity experts work alongside customers to rapidly detect, investigate, and disrupt relevant threats – before they have the chance to develop into major incidents. Global customers, including Fortune 500 leaders across all major market verticals, rely on Check Point External Risk Management to protect themselves from an array of external risks, including vulnerabilities, misconfigurations, phishing, impersonation attacks, malware infections, exposed credentials, data leaks, fraud, and 3rd party risks.
