

Sense, adapt and optimize your workspace.

Cisco Smart Buildings Solutions

Today's workplaces are dynamic, but most buildings are still static. AI, IoT, hybrid work and sustainability targets are reshaping how space is used, while leaders need real-time insight to act. Because the network already reaches every room, it is the ideal foundation for a smarter, more adaptive building. Cisco Smart Buildings Solutions, delivered with CDW, pair Cisco Spaces with Meraki MT sensors to deliver real-time environmental insights that optimize and adapt physical workspaces.

Cisco Smart Buildings Solutions can help you achieve:

Optimized Workspaces

Healthier Environments

Energy Savings

Finding the Right Solution

When modernizing your buildings, organizations benefit from a tried-and-true framework. Together, CDW and Cisco deliver customized services at every stage of the smart-buildings lifecycle:

- **Consulting services** explore the right approach for your spaces, pairing Cisco platforms — Cisco Spaces, Meraki MT sensors and Catalyst — with a solution built for your needs.
- **Assessments** review your current network, sensor coverage and space utilization to ready your environment for real-time environmental insight.
- **Design and planning** optimize sensor placement and Cisco Spaces integration for accurate occupancy, air-quality and CO2 data.
- **Implementation services** configure and deploy Cisco Spaces and Meraki MT sensors with minimal disruption across campus and branch.
- **Managed services** hand off monitoring, maintenance and reporting to our experts, with insights and automation that adjust HVAC and save energy when rooms sit empty.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

CDW + CISCO

With building demands constantly evolving, your organization needs a trusted partner to design, orchestrate and manage smart, adaptive spaces. Cisco delivers the enterprise-wide architecture to turn your network into a sensor across every domain — access points, switches, collaboration devices and Meraki MT sensors. As a Cisco partner, CDW's experts take a lifecycle approach to delivering Cisco Smart Buildings Solutions, following industry-leading practices so every deployment goes smoothly and you can focus on the business value that matters.
