

# WE GET TRUSTED ACCESS REQUIRES A TRUSTED PARTNER.

CDW Amplified™ Secure Platform  
Cisco Duo Implementation Services

At CDW, we understand your need to get the most out of your Cisco Duo solution so that you can provide secure access to your applications and data – on any device, from anywhere. That's why so many organizations work with CDW: we can quickly design, deploy and configure their network security environments using industry best practices.

Cisco Duo Implementation Services can help you achieve:

 Operational Efficiencies
  Reduced Risk
  Reduced Cost

## Orchestrating the Right Solution

When expertly implemented, Cisco Duo proactively reduces the risk of a data breach by verifying users' identities, gaining visibility into every device and enforcing adaptive policies to secure access to every application.

## CDW GETS CISCO

Cisco is widely known for creating and developing innovative, industry-leading technologies. Cisco from CDW takes that innovation one step further. We build customizable, end-to-end solutions using Cisco products, pushing the limits of the technology and integrating the products into our clients' IT environments to solve their unique business challenges.

Our Network Security practice has a Cisco Security Master Certification, five Cisco Certified Internetwork Expert Security (CCIE Security) Certifications, two Cisco Certified Network Professional - Security (CCNP-SEC) Certifications and more than 150 engineers, project managers and contractors focused on Cisco Network Security projects. We value our partnership with Cisco and what it can deliver to our clients.

As Cisco's No. 1 partner in collaboration, unified computing systems and wireless, we've racked up a number of awards:

- 2018 Architectural Excellence Partner of the Year: Security
- 2018 Collaboration Partner of the Year: U.S.
- 2018 Achieved Master Networking Specialization
- 2017 Partner of the Year: U.S.
- 2017 Architectural Excellence Partner of the Year Award
