

Blueprint for a smarter SMB workplace

Ready to transform your small or medium business into a Smart SMB? Follow the Cisco Meraki blueprint to create a smarter, more sustainable workplace that drives business growth and improves employee and customer experiences.

Identify workspace challenges

Look around. Where are the pain points in your physical workspace? What's holding back your SMB from being more efficient and innovative? From accelerating growth?

of SMBs consider technology to be critical to business success. They're exploring ways to use smart workspace solutions to increase operational resilience, reduce costs, capture new revenue, improve safety and security, and more.¹

of SMBs see IT as a source of innovation. Yet 80% of SMB IT teams are preoccupied with support and maintenance tasks, leaving little time for innovation.¹
