

# Hybrid environments, is your business ready?

## Collaboration Device Assessment

Do you have aging meeting space video devices that are reaching end of support? Do you have concerns that the equipment you have does not fit the requirements of your meeting space? Do you want to take full advantage of multiple platforms when you join Webex, Teams, Zoom or Google meetings? CDW has the expertise to turn your meetings spaces into modern workspaces.

Collaboration Device Assessment can help you achieve:

**Reliability**

**Agility**

**Increased  
Performance**

### Finding the Right Solution

Collaboration Device Assessment allows you to assess up to 20 meeting rooms and current collaboration devices. What can you expect from a Collaboration Device Assessment?

- Collaborate with the customer to document room dimensions, physical layout and existing collaboration devices in order to provide tailored recommendations.
- Assess the current collaboration devices to determine whether they are at end of life, end of sale or suitable for the space according to best practices.
- Deliver a comprehensive report to the customer that outlines modern Cisco video devices appropriate for the evaluated spaces.
- Recommend an initial device for a chosen space and configure it within Webex Control Hub and/or Microsoft Teams via the seed program.

## CDW + CISCO

CDW's collaboration solutions are expertly orchestrated, user-centric solutions that can deliver profitable business outcomes through improved communication, productivity and engagement. CDW has more than 20 years of delivering Cisco solutions to organizations like yours. This experience ensures that our customers receive the highest level of expertise while partnering with them to build a complete collaboration solution that suits their unique needs. Cisco and CDW have tight alignment across all areas of the business, allowing us to deliver a seamless experience to our customers.
