CDW Amplified™ Physical Security
Meraki MV + MT QuickStart

The Meraki MV + MT QuickStart service provides remote configuration assistance and customer orientation for a new Cisco Meraki MV video surveillance and MT sensor solution deployment. It's intended to help a new Meraki MV + MT customer quickly configure and optimize their new cloud-based video surveillance and sensor solution based on best practices and train them on both the basic and advanced features of the solution. This includes configuration of the Meraki cloud dashboard, optimization of Meraki MV surveillance cameras and MT sensors, and configuration of analytics and alert notifications.

The Meraki MV + MT QuickStart can help you achieve:

-  **Reduced Risk**
-  **Operational Efficiencies**
-  **Agility**

Orchestrating the Right Solution

This QuickStart will provide for the following over a three-and-a-half-day period:

- Configuration of the Meraki dashboard
- Import of up to 100 total Meraki devices into the Meraki dashboard
- Configuration and optimization of up to 10 individual Meraki MV cameras and 10 MT sensors according to best practices
- Configuration and testing of video analytics features, video sharing and archival, sensor status alert thresholds, and notification systems
- Knowledge transfer and customer orientation on all configuration activities, preparing the customer to configure additional devices and operate the system on a go-forward basis

The reasonably priced QuickStart is easy to buy as a fixed-scope, fixed-price service that delivers huge value:

Service	CDW EDC	Customer price
Meraki MV + MT QuickStart	6881135	\$6,560

This service does not include physical installation of cameras or cabling, which are available from CDW as a separate service.

CDW GETS CISCO MERAKI

CDW is an end-to-end provider of physical security solutions and services. We help customers protect their people, property, and premises by deploying and integrating video surveillance, access control and environmental sensor systems to become modern physical security platforms.

With Meraki MV and MT, CDW can help you move those physical security capabilities into a cloud-managed architecture that is scalable and easy to use.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Service Details

The following are included in the Meraki MV + MT QuickStart:

Meraki MV + MT QuickStart	Included
Planning and Design	
Review customer's deployment of Meraki MV cameras and MT sensors, including floor plans illustrating sensor and camera placement and field of view	✓
Review best practices for camera groups, camera and sensor naming conventions, and other Meraki dashboard global management features	✓
Identify up to 10 specific Meraki MV cameras and 10 specific MT sensors on which CDW engineers will perform configuration and optimization activities	✓
Identify customer's target use cases for Meraki features for which to prioritize configuration, optimization, and knowledge transfer activities	✓
Configuration and Optimization	
For the Meraki dashboard: <ul style="list-style-type: none"> · Activate and import up to 100 Meraki MV and MT devices (if needed) · Apply desired naming conventions to MV Cameras and MT Sensors · Create up to five Camera Access Groups · Create and apply up to four Camera Profiles for camera groups (e.g., entrances, hallways, outdoors, etc.) · Add and configure floor plans with cameras and sensors (up to a maximum of two floor plans and 25 cameras or sensors) · Add Cloud Archiving license to dashboard (if applicable) 	✓
For up to 10 individual Meraki MV Cameras: <ul style="list-style-type: none"> · Adjust camera optical and digital zoom, focus, and sensor crop features to optimize the field of view for target areas · Create privacy windows (if needed) · Adjust video retention for cameras that are outside of defined Camera Profiles · Configure wireless networking (if needed) for supported cameras 	✓
Configure the following Meraki video features, if desired by customer: <ul style="list-style-type: none"> · Motion Alerts on up to five MV Cameras · Object Detection on up to five MV Cameras · Motion Heatmaps on up to five MV Cameras · Recording Schedules (up to two) 	✓
For up to 10 individual Meraki MT Sensors: <ul style="list-style-type: none"> · Configure sensor status alert thresholds · Configure up to three Sensor Alert Profiles and assign MT Sensors 	✓
Testing	
Test and validate the following functionality: <ul style="list-style-type: none"> · Archiving video (up to two events) · Notifications (up to two notification types) · Analytics (on up to five cameras) · Meraki Mobile App (for up to one user) · MT Sensor data collection and reporting (on up to 10 sensors) 	✓
Knowledge Transfer and Customer Orientation	
Review settings and configurations made to Meraki Dashboard, MV Cameras, and MT Sensors that were in scope for the engagement	✓
Demonstrate how to view, share and export MV Camera video; use Motion Recap and Search; and use Meraki Vision Portal for camera operators	✓
Review how to view MT Sensor readings and historical data	✓
Review general administration and camera operator tasks	✓
Review benefits of advanced features such as RTSP, MV Sense, and MQTT	✓
Review how to get help on Meraki products, via both online knowledge base and support requests	✓
