

IT organizations are facing increasingly complex, siloed multicloud ecosystems.

- Rate of change is unmanageable
- Unclear path to new ecosystems
- Vendor lock-in
- Limited resources and skills gaps
- Inflexible infrastructure

89% say usage of multiple hypervisor options is a strategic imperative¹

90% say their overall IT environment has become more complex the past two years²

Customers need the freedom to quickly adapt to changing priorities, seamlessly run their workloads however their business needs dictate and manage IT as a strategic differentiator.

Dell Private Cloud

DELIVERED THROUGH DELL AUTOMATION PLATFORM

Freedom and ease to evolve on your terms

Dell Private Cloud is built using a disaggregated infrastructure with intelligent orchestration to ensure performance, scalability, cost efficiency and freedom from vendor lock-in.

- Fully adaptable and reusable infrastructure
- Flexibility to bring your own licenses
- Curated catalog of validated blueprints
- Intelligent lifecycle management
- Investment protection in an ever-changing IT landscape
- Single source of solution-level support

Onboard

Zero touch hardware onboarding and automated provisioning

Provision

Select and provision preferred vendor software from Dell's curated catalog

Manage

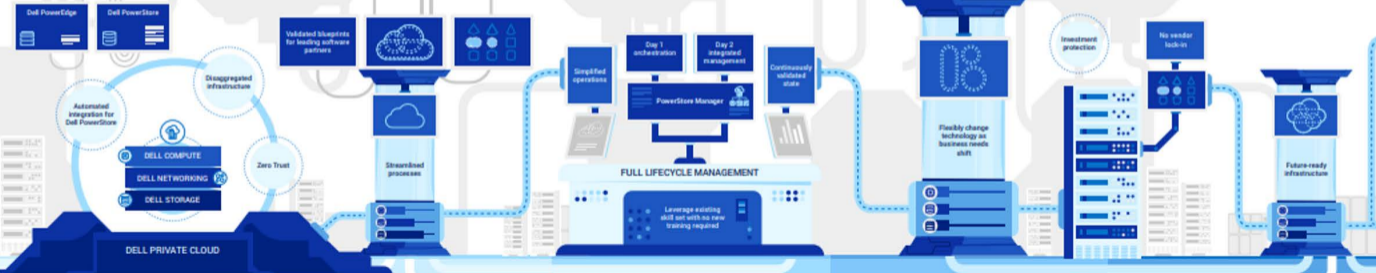

Access familiar and consistent tools to manage and provision your environment

Decommission

Return infrastructure resources and set up a new ready-to-provision state

Repurpose
