DYNAMIC THREAT DEFENSE

Prevent zero-day threats with powerful cloud-based sandboxing
ESET Dynamic Threat Defense provides another layer of security for ESET products like Mail Security and Endpoint products by utilizing a cloud-based sandboxing technology to detect new, never-before-seen types of threats, especially ransomware. This sandbox consists of multiple types of sensors that complete static analysis of code, deep inspection of the sample with machine learning, in-memory introspection and behavior-based detection.

The ESET difference

**MULTILAYERED PROTECTION**

Within Dynamic Threat Defense, ESET utilizes 3 different machine learning models once a file is submitted. After that, it runs the sample through a full sandbox which simulates user behavior to trick anti-evasive techniques. Next, a deep learning neural network is used to compare the behavior seen versus historical behavioral data. Last but not least, the latest version of ESET’s scanning engine is used to take everything apart and analyzed for anything unusual.

**FULL VISIBILITY**

For every analyzed sample, you can view the final result in the ESET PROTECT console. On top of that, customers with more than 100-seat license get a full behavioral report with detailed information about samples and their behavior observed during analysis in the sandbox – all in an easy-to-understand form. Not only do we simply display samples that were sent to ESET Dynamic Threat Defense but everything that is sent to ESET’s Cloud Malware Protection System – ESET LiveGrid®.

**MOBILITY**

Nowadays, customers are constantly traveling and not on premise, that is why ESET Dynamic Threat Defense is able to analyze files no matter where users are. The best part is that if anything malicious is detected, the whole company is immediately protected.

**UNPARALLELED SPEED**

Every minute counts, which is why ESET Dynamic Threat Defense is able to analyze the majority of samples in under 5 minutes. If a sample was previously analyzed, it is simply a few seconds until all devices at your organization are protected.

**PROVEN AND TRUSTED**

ESET has been in the security industry for over 30 years, and we continue to evolve our technology to stay one step ahead of the newest threats. This has led us to be trusted by over 110 million users worldwide. Our technology is constantly scrutinized and validated by third-party testers who show how effective our approach is at stopping the latest threats.
How ESET Dynamic Threat Defense works

With ESET Mail Security

- Internet
- Email sent
- Upload sample/attachment
- Sample is being analyzed
- Analysis result: malicious
- Analysis result: clean
- Email delivered to user
- All company endpoints updated
- Quarantine email
- ESET Mail Security
- Email status information
- ESET Dynamic Threat Defense
- Sample status and information
- ESET PROTECT

Complete visibility – see all files sent to ESET LiveGrid®
ESET Dynamic Threat Defense

technical features

AUTOMATIC PROTECTION

Once everything is set up, there is no action needed by the admin or the user. The endpoint or server product automatically decides whether a sample is good, bad or unknown. If the sample is unknown, it is sent to ESET Dynamic Threat Defense for analyzing. Once analysis is finished, the result is shared and the endpoint products respond accordingly.

TAILORED CUSTOMIZATION

ESET allows per-computer detailed policy configuration for ESET Dynamic Threat Defense so the admin can control what is sent and what should happen based on the receiving result.

MANUAL SUBMISSION

At any time, a user or admin can submit samples via an ESET compatible product for analysis and get the full result. Admins will see who sent what and what the result was directly in the ESET PROTECT console.

MAIL SECURITY PROTECTION

Not only does ESET Dynamic Threat Defense work with files, but it also works directly with ESET Mail Security to ensure that malicious emails are not delivered to your organization. To ensure business continuity, only emails coming from outside of the organization can be sent to ESET Dynamic Threat Defense for inspection.

“The biggest thing that stands out is its strong technical advantage over other products in the marketplace. ESET offers us reliable security, meaning that I can work on any project at any time knowing our computers are protected 100%.”
