ESET PROTECT Elite is an all-in-one solution for organizations that need increased visibility into their networks. Its enterprise-grade XDR ensures that emerging threats, careless employee behavior and unwanted applications do not place your corporate reputation or profits at risk.

Proactively responding to the ever-evolving threat landscape, ESET PROTECT Elite equips your cyber defenses with multiple, continuously innovated layers of protection covering endpoints, mail, cloud collaboration and storage.

This solution includes advanced threat defense technology to prevent new, never-before-seen threat types, delivers continuous vulnerability assessment with risk-based prioritization and remediation to reduce your exposure to attack, and full disk encryption—along with multi-factor authentication for enhanced data and identity protection.

HOW YOUR ORGANIZATION WILL BENEFIT

- Unique behavior and reputation-based detection that gives your security teams full visibility, and real-time feedback gathered from the 100 million+ endpoints utilized by our ESET LiveGrid.
- Improved protection against ransomware and zero-day threats via cloud-based sandboxing technology.
- Helps you comply with data regulations thanks to full disk encryption capabilities on Windows and macOS.
- Decreases security risks by adding multi-factor authentication capabilities to your common systems and applications.
- Protection against disruption caused by email-based attacks and malware in Microsoft 365 cloud applications.
- Protection of your mail servers from malware, spam or phishing attacks.
- Easily accessible ESET PROTECT Cloud console improves TCO of security management.
- ESET Vulnerability & Patch Management actively tracks vulnerabilities in operating systems and common applications, delivering automated patching across all endpoints.
- Company endpoints and mobiles are protected via advanced ESET LiveSense multilayered technology.

A FULL SPECTRUM OF CAPABILITIES

ADVANCED THREAT DEFENSE WITH CLOUD SANDBOXING TO PREVENT RANSOMWARE

ESET LiveGuard Advanced provides proactive protection against new, never-before-seen threats, by executing all submitted suspicious samples in an isolated and powerful cloud sandbox environment, in order to evaluate their behavior using threat intelligence feeds, ESET's multiple internal tools for static and dynamic analysis, and reputation data.

- o Advanced unpacking & scanning
- o Cutting-edge machine learning
- o In-depth behavioral analysis
- o Cloud sandboxing

MULTILAYERED ENDPOINT PROTECTION INCLUDING SERVER SECURITY

ESET Endpoint Security provides strong malware and exploit prevention and can detect malware before, during and after execution. Now it also features anti-password guessing technology.

ESET Server Security provides lightweight multilayered server protection, to ensure business continuity.

- o Block targeted attacks
- o Prevent data breaches
- o Stop fileless attacks
- o Detect advanced persistent threats

ADVANCED PROTECTION FOR EMAIL AND CLOUD COLLABORATION OR STORAGE

ESET Cloud Office Security provides advanced protection for Microsoft 365 applications by means of an easy-to-use cloud console. The combination of spam filtering, anti-malware scanning and anti-phishing helps to protect your company communications and cloud storage.

- o Includes advanced threat defense capability with ultimate protection against new, never-before-seen threat types, especially ransomware
- o Visibility in detections and quarantine via anytime-accessible console
- o Automatic protection of new user mailboxes.
- o Immediate notification when detection of malware occurs

ESET Mail Security provides an additional layer of defense at the server level to prevent spam and malware from ever reaching users' mailboxes.

POWERFUL ENCRYPTION MANAGED NATIVELY BY ESET PROTECT

ESET Full Disk Encryption is a feature native to the ESET PROTECT console. It allows one-click deployment and encryption of data on connected Windows and Mac endpoints. ESET Full Disk Encryption significantly increases your organization's data security and helps you comply with data protection regulations.

- o Manage encryption on Windows and macOS machines
- o Encrypt system disks, partitions or entire drives
- o Deploy, activate and encrypt devices in a single action

CONSOLE—ESET'S UNIFIED PLATFORM INTERFACE

ESET PROTECT is a cloud-based or on-prem multifunctional remote network security management tool for ESET business security products across all operating systems. It enables one-click security deployment and the cloud console gives you network visibility without the need to buy or maintain additional hardware, reducing total cost of ownership.

- Seamless setup and deployment
- Cloud deployment does not require additional hardware or software
- Single point of network security management
- Saves time with automated tasks

SINGLE-TAP, MOBILE-BASED MULTI-FACTOR AUTHENTICATION

ESET Secure Authentication is an easy-to-use, effective mobile-based multi-factor authentication (MFA) solution that will protect your organization from vulnerabilities caused by weak passwords and unauthorized access attempts.

- Simple, one-tap authentication for users
- Push notification
- Supports your existing tokens and hardware keys
- VPN, RDP and Outlook authentication

ACTIVELY ASSESS & FIX VULNERABILITIES ACROSS ALL YOUR ENDPOINTS

ESET Vulnerability & Patch Management actively tracks vulnerabilities in operating systems and common applications and enables automated patching across all endpoints, managed via our unified platform.

- Manage patching centrally from the ESET PROTECT Cloud console
- Automate your scanning with customizable schedule settings
- Filter, group and sort vulnerabilities based on their severity
- Choose from automatic and manual patching options
- Customize your patching policies

ESET'S XDR-ENABLING TOOL

ESET's XDR-enabling solution, **ESET Inspect**, boosts breach prevention by delivering enhanced visibility, threat hunting, and incident response capabilities that are designed to mitigate any discovered threats.

- ESET Inspect analyzes vast amounts of data in real time, so no threat goes undetected
- Offers synchronized detection and remediation of threats in multiplatform environments
- Flexible deployment options, via cloud or on-prem installation, according to your priorities

ESET MANAGED DETECTION AND RESPONSE

Add MDR to ESET PROTECT Elite to create your complete managed security solution. ESET Managed Detection and Response provides effective help with incident investigation, performs robust analysis of potentially harmful files, and implements response and remediation steps to ensure business continuity.

About ESET

WHEN TECHNOLOGY ENABLES PROGRESS, ESET® IS HERE TO PROTECT IT.

ESET brings over 30 years of technology-driven innovation and provides the most advanced cybersecurity solutions on the market. Our modern endpoint protection is powered by unique ESET LiveSense® multilayered security technologies, combined with the continuous use of machine learning and cloud computing. Backed by the world's best threat intelligence and research, ESET products offer the perfect balance of prevention, detection and response capabilities. With high usability and unparalleled speed, we are dedicated to protecting the progress of our customers, ensuring maximum protection.

RECOGNITION

ESET received the Business Security APPROVED award from AV - Comparatives in the Business Security Test in December 2022.

ESET consistently achieves top rankings on the global G2 user review platform and its solutions are appreciated by customers worldwide.

ESET has been recognized as a 'Top Player' for the fourth year in a row in Radicati's 2023 Advanced Persistent Threat Market Quadrant.
